

Dec 2022

Dear Valued Customer:

3M is seeing delays in delivery of raw materials used to manufacture the TR-3600 prefilter that is typically included in the following kits and assemblies:

TR-300+ HKL, TR-300+ HKS, TR-300+ ECK, TR-300+ HIK, TR-305+, TR-306+, TR-307+, TR-315E+

The TR-3600 prefilter is an optional accessory. Using a TR-300 PAPR system without a TR-3600 prefilter does not affect the respiratory protection provided by this product. Rather than delay shipments of the entire PAPR system, this kit/assembly has been shipped without a TR-3600 prefilter. A typical kit or assembly contains a single TR-3600 prefilter. We expect to have replacement TR-3600 prefilters available in Q1 2023. At that time, if you wish to receive a replacement for the missing prefilters, please contact your 3M sales representative, and a prefilter will be shipped to you free of charge.

Should you have any questions, please contact your local Sales Representative or 3M Personal Safety Division Technical Service.

Sincerely,

3M Personal Safety Division
