Help improve patient adherence to therapy.

Remote Therapy Monitoring | Virtual Therapy Specialists | Active Engagement

1. Patient
   The patient’s Negative Pressure Wound Therapy (NPWT) device generates data while it is being used in the patient’s home.

2. Remote Therapy Monitoring (RTM)
   Periodically transmits the data from the device to iOn Progress™ Care Network.

3. Patient Support
   iOn Progress™ Care Network monitors “dashboards” to optimize patient adherence and assist when necessary.

4. Interaction
   Patients below the minimum threshold of therapy or in need of support are contacted by iOn Progress™ Care Network.

5. Caregiver
   If unable to resolve therapy related issues a caregiver can be notified.

Keeping wound treatment on track.
iOn Progress™ Remote Therapy Monitoring System combines proprietary technology and data with an expert team of virtual therapy specialists.
Patient adherence impacts healing.$^2$
Real world data of 1,800+ patients without iOn Progress™ Remote Therapy Monitoring (RTM) showed that increasing adherence to 3M™ V.A.C.® Therapy led to a greater reduction in wound volume.$^1$

Decreasing per patient wound-related costs is possible.$^†$
Real world data of 3M™ V.A.C.® Therapy patients demonstrated cost savings compared to other NPWT providers. V.A.C.® Therapy with RTM demonstrated even further benefits.

iOn Progress RTM demonstrates proven benefits.$^2$
Active Monitoring
3M has provided iOn Progress RTM to 100,000+ patients in the U.S. since the program was launched in 2016. Our analysis of RTM user data from 2016–2022 found the following:$^2$

<table>
