

## 3M™ M\*Modal Fluency Direct compatibility with Altera Digital Health

- Combine documentation and CDI into one workflow with CAPD
- Speech enable Altera Digital Health EHR systems so that clinicians of any medical specialty can create better, faster and more complete documentation
- Create time to care with an AI-powered closed-loop clinical documentation system using CAPD functionality

### The 3M advantage

The combination of 3M and M\*Modal allows us to use our strengths to close the loop between care and revenue integrity.

Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

### Call today

For more information on how 3M products and services can assist your organization, contact your 3M sales representative, call us toll-free at **800-367-2447**, or visit us online at [www.3M.com/his](http://www.3M.com/his).

### Unified workflow

Cloud-based 3M™ M\*Modal Fluency Direct is engineered to support Altera Digital Health acute care and ambulatory electronic health records (EHRs). AI-powered computer-assisted physician documentation (CAPD) combines documentation creation and clinical documentation integrity (CDI) into a unified workflow.

All Altera Digital Health acute care and ambulatory EHRs are fully supported by 3M, both inside and outside virtual environments.

- Altera Digital Health Sunrise™ is supported in a Citrix® environment and fully compatible with 3M Fluency Direct for easy access to direct dictation, single sign-on and a robust library of commands. The technology provides real time, automated CAPD feedback to clinicians as the note is created in the EHR via templates, typing, dot phrases or real time speech recognition. This optimizes physician workflows by delivering timely, context-specific and high value feedback to doctors proactively in support of CDI, ICD-10 and best practices.
- Altera Digital Health TouchWorks® is fully compatible with 3M Fluency Direct, whether it is deployed virtually or locally, so that users can have complete text, command-and-control support natively within the application. 3M CAPD technology can also deliver physician-assistive insights on hierarchical condition categories (HCCs) opportunities and codes, as well as patient disease states, problems and care needs at the point of care and within the EHR documentation workflows.
- Altera Digital Health Paragon™, the web-based EHR, is fully compatible with 3M Fluency Direct and CAPD technology for a smart, speech-driven workflow to improve physician efficiency and satisfaction, thereby improving documentation quality and creating time to care for doctors.
