

## 3M™ M\*Modal CDI Collaborate

- Generates worklist priorities that drive CDI team consistency and efficiency
- Streamlines the query and review workflows

### The 3M advantage

Integrated workflows for Clinical record review close the loop between clinical care and revenue integrity.

Users can launch the 3M™ Codefinder™ from 3M CDI Collaborate, passing in existing codes and patient demographic information. The resulting codes and DRG information are passed back to 3M CDI Collaborate upon completion.

Leverage 3M’s proven clinical knowledge base developed over three decades.

### Connected workflows drive quality and revenue integrity

Today the healthcare sector struggles to find a balance between revenue integrity and clinical care, it is under great pressure to deliver clinical documentation that is fast, accurate, and compliant. While posing significant downstream challenges for CDI teams, quality teams, and coders, lack of quality clinical documentation is contributing to a wave of concerns among medical professionals and care teams. By offering the appropriate technology in the relevant workflow, 3M offers a comprehensive approach to clinical documentation excellence through a wide range of workflow solutions for clinicians and CDI teams.

**3M CDI Collaborate** is a cloud-based CDI solution used to enhance chart review and query workflow. This technology driven, workflow management solution streamlines clinical documentation workflow by giving users a single access point to all encounter information. CDI Collaborate has the capability to sort and subsequently focus on priority encounters, generate query templates, track communication and activity within each encounter.

#### How technology can help

**Prioritised Worklist**

**3M Codefinder Integration**

**CDI Program Reporting**

**Query Workflow**

**Query Template**

**CSD Workflow Tracking**

### Technology advancement helps in CDI worklist prioritisation and workflow management

**Prioritised Worklist** – 3M CDI Collaborate helps to prioritise chart review by providing auto-generated and up to date worklists. It eliminates much of the manual decision making for which cases should be reviewed for clinical documentation integrity.

**3M Codefinder Integration** – Generation of provisional AR-DRGs as well as tracking DRG changes is made easy with seamless integration with existing 3M Codefinder.

**CDI Program Reporting** – A self-service reporting platform generates detailed reports of CDI activity outcomes.

**CDS Workflow Tracking** – CDI managers can also use reporting tools and a sophisticated search functionality to quickly identify priorities and spot trends to improve performance.

**Query Template** – Collaborate allows import of existing query templates for easy launch and edit, allowing auto population of patient demographic information thereby saving CDS’s time to focus on other value add activities.

**Query Workflow** – CDI specialists can monitor outstanding queries and can track the outcomes when responses for the resolved queries as received.

## Our combined strength

**300+**

Active industry partnerships\*

**20 countries**

Use 3M Health Information  
Systems products

**250 million+**

Clinical documents pass through  
our systems every month\*

**750+**

ANZ region hospitals use 3M  
clinical coding solutions

**30+ years**

of working with Australian and  
New Zealand hospitals

**2,800+**

Facilities send data through our 3M  
Clinical Discovery Engine every day\*

\* Global data.
