Glass Finishes

3M™ FASARA™ Glass Finishes
Case Study 2022
Innova Kitchens

A beautiful balance
between practicality
and creativity.

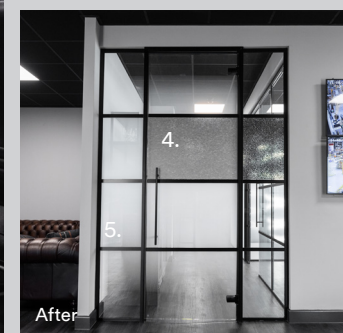

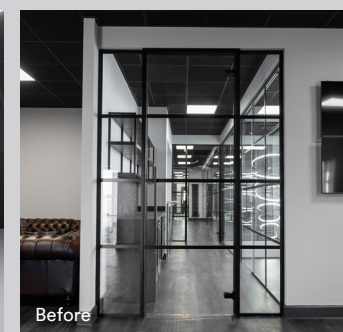

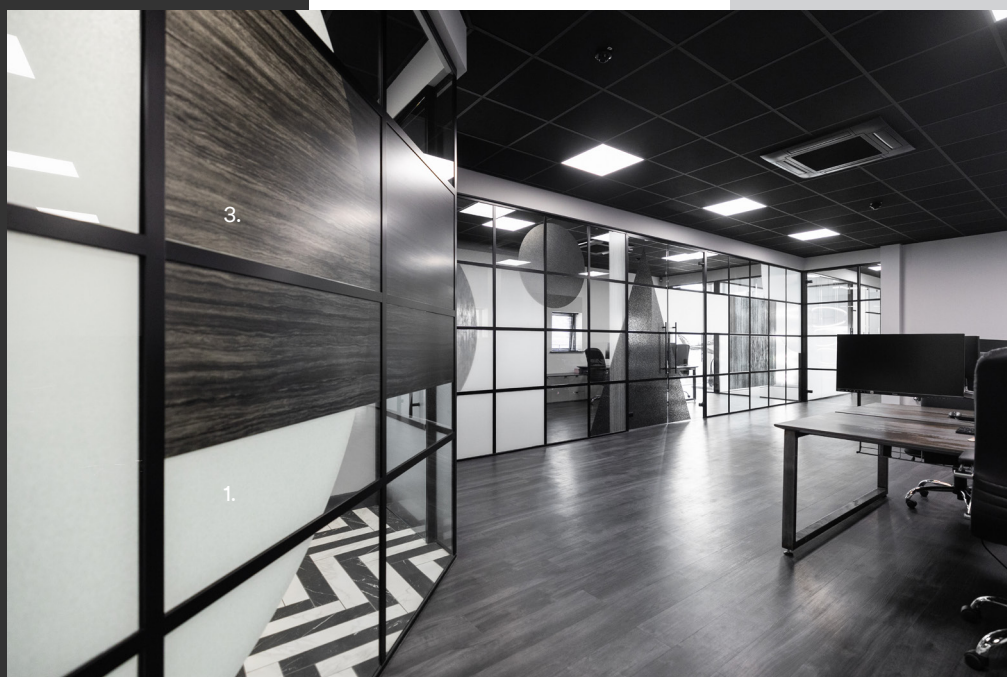

Achieving light and privacy, fused with cutting edge design.

Innova Kitchens are one of the worlds largest online kitchen retailers. As a company with design at its core, their flagship head office was built with a bold sense of style in mind. Nonetheless, Innova Kitchens were not wanting to sacrifice their open space concept. Making the space work as a busy office environment was essential to their restoration.

With large areas of glass originally built into the architecture of the building, Innova Kitchens wanted to use this as a focal point. They were in need of a product that would enhance their existing space space without compromising the natural light. The objective was to keep an open feel environment, with light filled spaces.

To help find a solution and bring their vision to life, Innova Kitchens worked with HG Surface, a 3M™ Endorsed Installer, who has extensive experience with 3M™ FASARA™ Glass Finishes.

The combination of finishes was chosen to reflect the original design intent while adding a new layer of beauty and privacy.

“The broad range of finishes has allowed us to call upon a palette inspired by nature, to deliver a truly ground breaking design.”

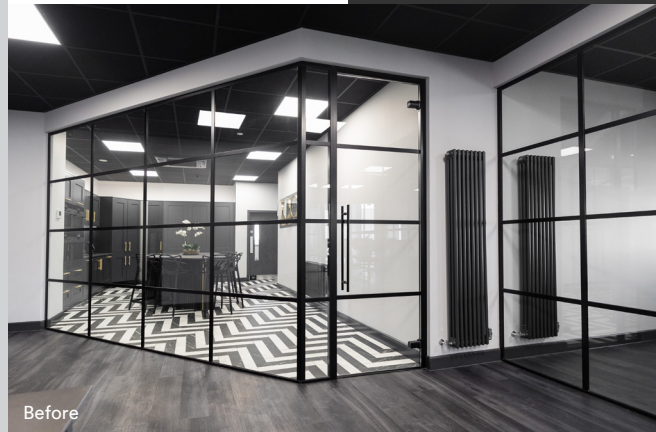

Rob Hoar | Senior Designer

Balancing striking design with practicality in a busy environment.

Prior to installation, the open-space allowed an abundance of natural light but lacked an element of design and privacy which posed a challenge for the busy work environment.

With this in mind, they designed a way to break up the spaces into manageable sections by installing 3M™ FASARA™ Glass Finishes. This created a perfect opportunity to utilize the existing architecture of the space in a new meaningful way.

The Stone and Travertine finishes capture the essence of the outdoors and bring a timeless sophistication to the space. The Mist center gradation provides spatial definition while enhancing the visual effects of the floor aperture. (aka floor opening)

FASARA™ Glass Finishes are constructed from durable, flexible polyester materials and can be installed quickly and easily. Leading to less downtime and disruption to daily business operations.

"The addition of the FASARA™ Glass Finishes to our workspace has added a new dimension in design, an added depth of style and a feeling of privacy without sacrificing light."

Rob Hoar | Senior Designer

FASARA™ Glass Finishes - Case Study 2022
Innova Kitchens - Featherstone, Yorkshire, UK

Case Study Summary:

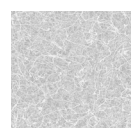

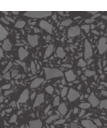

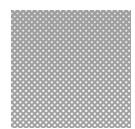

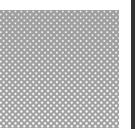

Challenge:

Innova Kitchens had recently moved into a new space that had beautiful glass architecture but was lacking in privacy suited for a busy work environment. Innova Kitchens needed a solution that didn't discourage the flow of natural light and could keep the existing built space as is.

Benefits:

With an advanced collection, 3M™ FASARA™ Glass Finishes allows you to create a space that captures the world's beauty while maintaining a practical application. The new on-trend gradation and natural finishes deliver a beautiful balance between practicality and creativity by tailoring light and shadow, forming a diffusion of light or creating privacy. With a variety of configurations to capture your privacy and design needs, the new range of patterns deliver simple elegance while enhancing space and natural light into your built environment.
