

Pharmaceutical Manufacturing Cleaning and Disinfecting

Chemicals are used to clean and disinfect pharmaceutical equipment, surfaces, and facilities.

Cleaning and disinfecting hazards

The potential hazards of disinfectants and cleaning chemicals may require exposure controls, such as personal protective equipment (PPE).

Chemicals in this category, with low Occupational Exposure Limits (OELs), may be corrosive to eyes and skin. Inhalation exposure to ingredients like peracetic acid and hydrogen peroxide may also require special protection considerations.

Airborne particulate hazards

Airborne gas/vapour hazards

Eye and face hazards

Dermal (skin) hazards

Important notice

Product selection and use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable national and/or European regulations and standards. Failure to properly evaluate, select, and use a 3M product in accordance with all applicable instructions and with appropriate safety equipment, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property.

Warranty, limited remedy, and disclaimer: A limitation of liability applies to the 3M product(s). For warranty statement and limitation of liability, refer to your supply agreement or the 3M terms and conditions of sale.

3M industrial and occupational products are intended, labeled, and packaged for sale to trained industrial and occupational customers for workplace use.
