

3M™ Cell Expansion Foam SJCEF

Features

- Flame retardant (UL94 HBF grade) (UL File E477414)
- Customizable compression plateau for consistent battery pressure
- Minimal compression set for long term durability
- Wide range of thicknesses allows material to accommodate multiple battery designs
- Thickness tolerance for improved battery packaging
- Low density material can help OEM's meet their lightweighting goals
- Self-adhering properties reduces process steps to help improve assembly efficiency

Potential Applications

- Can help address forces generated in the assembly and operation of modules
- Other applications are currently out of scope but contact your 3M representative to discuss potential new applications
