

3M™ Semi-Structural Insulation Tape 1924B-1

Features

- UV initiation adhesive system for semi-structural bonding
- Application at room temperature
- Good initial bonding to shorten process time
- Easy operation process, same as PSA tape
- Excellent aging performance
- Reliable electrical insulation property

Potential Applications

- Cold plate insulation
- Battery module housing insulation
- Other applications are currently out of scope but contact your 3M representative to discuss potential new applications
