

Working with overhead anchorage points.

Fall Arrest Lanyard

Self Retracting Lifelines

Structural Self Retracting Lifeline

pSRL personal Self Retracting Lifeline

4.75 m

3 m

Clearance requirement from the work surface for a Fall Arrest Lanyard.*

When considering products for use especially where fall clearances are reduced, a SRL or pSRL can stop and decelerate a user falling from an overhead anchorage in a lesser distance, compared to a Fall Arrest lanyard.*

Clearance requirement from the work surface for a structural or personal Self Retracting Lifeline.*

*Always check the User Instructions of the specific device to properly understand the required fall clearance for safe working clearances.
