

Fit testing at your fingertips.

Introducing the
3M™ Wear it Right App.

Helps fit testers and wearers follow the exact fit test protocol at every step of the process.

The 3M™ Wear it Right App makes the task of qualitative fit testing less tedious with the tap of a button. Grab your 3M™ Fit Test Kit, download the app, and you'll be ready to experience convenient digital data recording. Test both reusable and disposable respirator wearers.

The app supports multiple types of fit tests, providing users consistent fit test protocols at every step of the process and helping to ensure accurate results. The app's ability to track completed fit tests directly on the device provides a useful record-keeping solution for compliance needs.

Download it for free and start fit testing with the 3M™ Wear it Right app.

Download the
app now.

Digital gets it done.

Streamline your fit testing program with the 3M™ Wear it Right App designed for use with a variety of devices.

Compliance, Confidence and Convenience

The current version of the app is preloaded with OSHA and ISO qualitative fit test protocols to help ensure testing requirements are consistently met* and provides easily accessible fit testing records.

Future app updates will include other languages and protocols.

Step-by-Step Instructions

Helps users follow fit test protocol with prompts for each step of the process to help ensure tests are performed correctly, which can reduce the need for on-going training.

Training on Demand

The app provides self-guided, in-depth instructions to make it easy for new fit testers to hit the ground running and reduce training time while helping both testers and wearers understand why fit matters.

Go Paperless

Oftentimes, the fit test process relies on paper recordkeeping. The app digitizes the fit test process, eliminating the need to track manually.

Easy Recordkeeping

The app acts as a digital data record and supports importing wearer details and exporting fit test records. All data collected is stored locally on the specific device being used**.

2 Modes, 1 App

The app has two modes—one for fit testers who need less step by step guidance and one for those who prefer more detailed guidance.

Versatile

Tests both reusable half facepiece and disposable respirator wearers, supports multiple OSHA and ISO tests (Bitrex™, Saccharin).

Download the app now.
