

3M™ Attest™ Rapid Readout Biological Indicators for Ethylene Oxide (EO)

Provides results in four hours!

*Under stated conditions of use. See 1294 Instructions for Use and 3M Attest 1294 Product Profile (70-2009-7462-7) from 3M for more information.

Fast results

3M™ Attest™ 1294 Rapid Readout Biological Indicators (RRBIs) for Ethylene Oxide (EO) provide results in 4 hours, detecting sterilization process failures at a much earlier stage.*

Reduce risks

With faster results, you can make decisions and take action prior to surgery, reducing the risks and costs associated with surgical infections.

Eliminate recalls

When each load is monitored and quarantined until results are available, recalls may be eliminated.

Efficient

Detect malfunctioning equipment sooner. Use to verify repairs more quickly and put your sterilizer back into service sooner.

Convenient packouts

- 3M™ Attest™ 1298 Rapid Readout Biological Indicators (RRBIs) for Ethylene Oxide (EO) Test Packs for monitoring EO cycles. The pack is specifically designed to present a resistant challenge to the EO sterilization process as is the Association for the Advancement of Medical Instrumentation (AAMI) routine syringe test pack.
- Attest 1294 RRBIs for EO for monitoring EO sterilization processes.

**3M STERILIZATION
ASSURANCE**
