

## 3M™ EMI Absorber AB8000 Series

### Product Description

3M™ EMI Absorber AB8000 Series is a high-temperature magnetic EMI absorber for near-field applications from 300 MHz to 4 GHz. 3M absorber AB8000 series is a composite absorber consisting of a silicone carrier resin and magnetic fillers. This material helps suppress near-field EMI noise and interacts and/or influences an Electro-Magnetic (EM) field to help reduce EMI transmissions or reflections

3M™ EMI Absorber AB8000 Series typical uses in the frequency range above the 5-10 MHz range is typically as an EMI EM field absorber as the higher loss ( $\mu''$ ) characteristics of the absorber provides excellent EM field reduction. 3M absorber AB8000 efficiently couples to the EM field or provides EM absorbing.

### Key Features

- High permeability
- Absorbing performance from 300 MHz to 4 GHz
- High performance resin system for solder reflow stable performance
- High temperature resistance (150°C)
- Available without adhesive
- Multiple thickness options
- Supplied on removable liners for easy handling and die-cutting
- 2-year shelf life
- \*Halogen Free

\*Halogen Free is defined as having maximum 900 ppm bromine, maximum 900 ppm chlorine, and/ or maximum 1500 ppm total bromine and chlorine, per IEC 61249-2-21

## Product Construction/ Materials Description

Note: The following technical information and data should be considered representative or typical only and should not be used for specification purposes.

3M™ EMI Absorber AB8000	
Product Code	Magnetic Layer Thickness Microns (mm)
AB8010-WO	100 um (0.1 mm)
AB8020-WO	200 um (0.2 mm)
AB8030-WO	300 um (0.3 mm)
AB8050-WO	500 um (0.5 mm)
Blue PET Release Liner	36 um (0.036 mm)
Transparent PET Release Liner	79 um (0.079 mm)

\*WO = without adhesive

## Application Ideas

3M™ EMI Absorber AB8000 Series can potentially be used for:

- Shield DC and low frequency magnetic field
- Mobile phones, computers, tablets, measurement and sensors devices.
- Protecting magnetic flux sensitive devices such as a hall sensor and a flux gate from external low frequency magnetic fields
- Electronic equipment protection for automobile applications

As an initial design, it is suggested to test the 3M absorber AB8000 series at the greatest thickness allowed (1x, 2x, 3x layers, etc.), largest XY dimension, in multiple locations or use multiple parts to determine a potential maximum performance level associated with the material and the end use assembly. Once a baseline level of performance is established, the 3M absorber AB8000 series XY shape, location, etc. can be reduced or changed to determine the minimum material needed to meet a specification.

It should be noted that once a maximum performance level is established for the end use device using 3M absorber AB8000 series, the overall design can be reviewed to understand if other absorber changes not initially considered, but now possible with the new performance level associated with using the 3M absorber AB8000 Series, materials could be considered. An example would be the absorber reducing EMI noise levels to allow for improved antenna Signal to Noise (SNR) ratio that could allow for higher data transfer speeds and/or longer-range performance.

## Effectiveness

3M™ EMI Absorber AB8000 Series performance and effectiveness is based on several application considerations:

- 1) Permeability ( $\mu'$ ) and Loss ( $\mu''$ ) of this material at the frequency range or frequency peak of the intended application can affect the performance. Permeability and Loss of the 3M™ EMI Absorber AB8000 Series varies with frequency and is a measure of how well the EM material may couple with the EM field and impact performance.
- 2) Thickness of the 3M absorber AB8000 series product can be used to help optimize an application's performance.
- 3) End use application orientation and location affects the 3M EM products interaction with an EM field.

## Typical Physical Properties and Performance Characteristics

**Note:** The following technical information and data should be considered representative or typical only and should not be used for specification purposes. Final product specifications and testing methods will be outlined in the product's Certificate of Analysis (COA) that is provided once the product is approved by 3M for general commercialization and development work is completed.

3M™ EMI Absorber AB8000	
Property	Value
Electrical Resistivity****	$2 \times 10^6 \Omega\text{m}$
Typical Permeability (@3 MHz)*	110~130
Temperature Range** / ***	1) -40 ~ 150°C ** 2) PASS short term typical Solder Reflow processing cycle***

\*Permeability and noted results of Vibrating Sample Magnetometers (VSMs) can vary with test method and/or equipment used for testing at different test sites. Permeability can vary with thickness of 3M absorber AB8000.

\*\* Based on general environmental performance characteristics of the polymer binder resin type. Each application should verify temperature and environmental performance in the end-use specific configuration.

\*\*\*The product has been tested for a typical Solder Reflow temperature profile and the material properties have remained stable

\*\*\* ASTM D257 Type Test Method

## Figure 1. Real and Imaginary Part of Permeability with Frequency

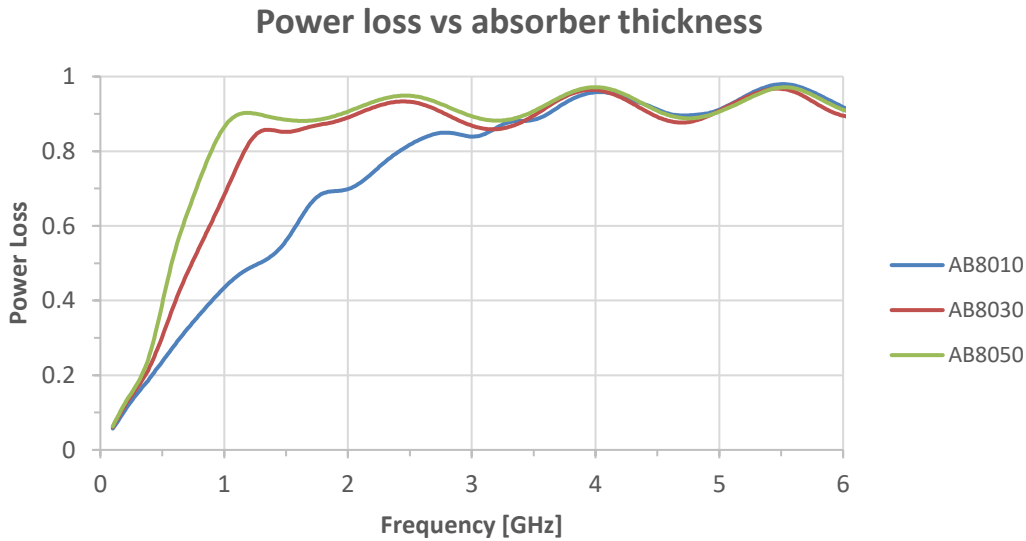

Test method: Short coax (Keysight magnetic test fixture 16454A) for 1-1000 MHz and 7-mm coax 1-6 GHz per ASTM D5568-01.

## Figure 2. Power Loss

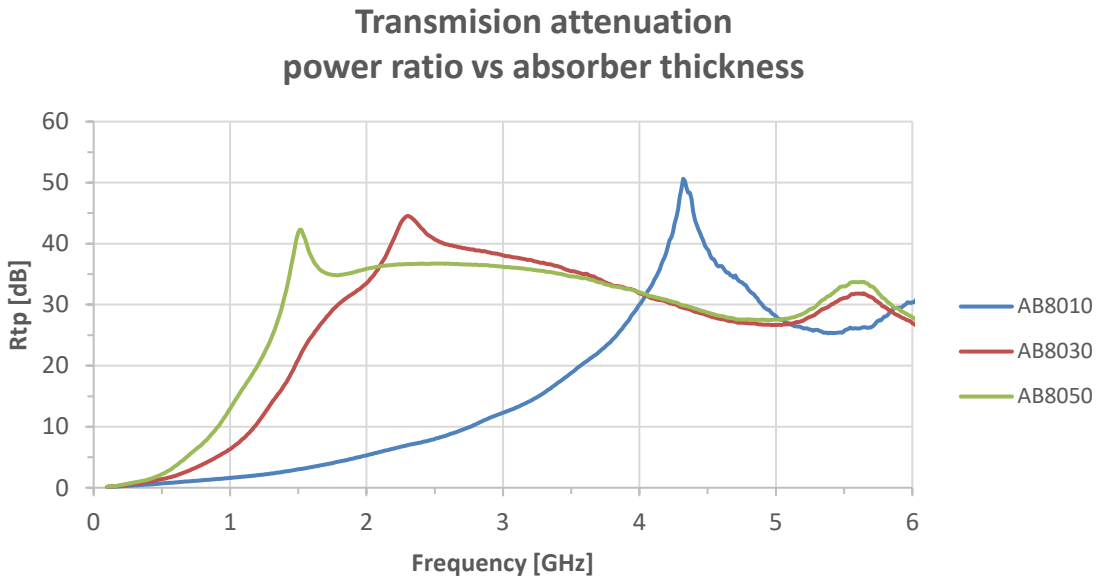

# 3M™ EMI Absorber AB8000 Series

Power loss was measured for each sample was in accordance with 3M internal test method TM-06-1078097.

## Figure 3. Transmission attenuation power ratio

Transmission attenuation power ratio  $R_{tp}$  was measured in accordance with section 4.3 of IEC62333-2. Lateral dimensions of the samples were chosen to be 100x75 mm.

## Storage and Shelf Life

# 3M™ EMI Absorber AB8000 Series

The shelf life of 3M™ EMI Absorber AB8000 Series is 24 months from the date of manufacture when stored in the original packaging materials and stored at 0–35°C (32–95°F) and 70% relative humidity.

## Certificate of Analysis (COA)

The 3M Certificate of Analysis (COA) for this product is established when the product is manufactured and deemed commercially available from 3M. The COA contains the 3M specifications, test methods and test results for the product's performance attributes that the product will be supplied against. Contact your local 3M representative for this product's COA.

**Technical Information:** The technical information, guidance, and other statements contained in this document or otherwise provided by 3M are based upon records, tests, or experience that 3M believes to be reliable, but the accuracy, completeness, and representative nature of such information is not guaranteed. Such information is intended for people with knowledge and technical skills sufficient to assess and apply their own informed judgment to the information. No license under any 3M or third party intellectual property rights is granted or implied with this information.

**Product Use:** Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product in accordance with all applicable instructions and with appropriate safety equipment, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property.

**Warranty, Limited Remedy, and Disclaimer:** Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specifications on the Certificate of Analysis, which is established when the product is manufactured and deemed commercially available and is provided at the time 3M ships the product. **3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE.** If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement or repair of the 3M product or refund of the purchase price.

**Limitation of Liability:** Except for the limited remedy stated above, and except to the extent prohibited by applicable law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.

**Disclaimer:** For industrial use only. Not intended, labeled or packaged for consumer sale or use.
