

APC™ Flash-Free
Adhesive Coated Appliance System

**Powered by
science.
Works like
magic.**

- Less than 2% bracket bond failure rate.*
- Saves up to 40% of bracket bonding time.*
- Helps protect tooth enamel throughout treatment.

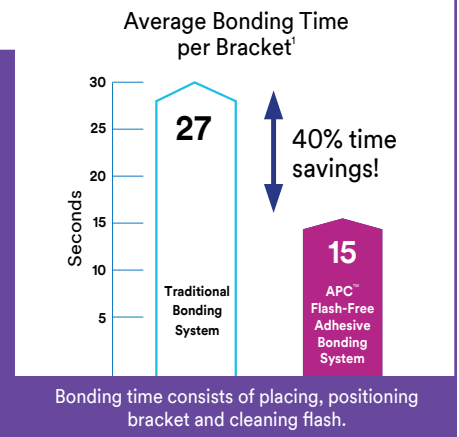

*Data on File

The APC™ Flash-Free Adhesive Coated Appliance System: The most efficient bonding system in orthodontics.

SAVE TIME AND COST

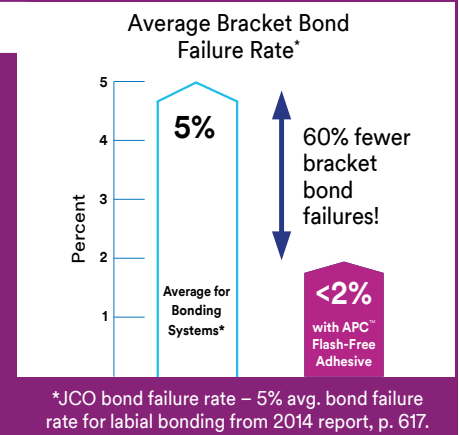

- Less than 2% bracket bond failure rate, saving time and cost.*
- Fewer steps to bonding completion, reducing bonding time and procedure complexity.
- Simple, easy cleanup at debonding.

GET SUPERIOR BONDING EFFICIENCY

- Less chance for accidental bracket movement after positioning, reducing the need for repositioning.
- Bonding time is reduced by up to 40% per bracket, reducing chair time, increasing efficiency.*

PROTECT TOOTH ENAMEL

- Protects tooth enamel under meniscus during treatment for improved tooth hygiene.

APC™ Flash-Free Adhesive
Smooth, consistent adhesive base.

Traditional Adhesive
Rough, inconsistent adhesive base from flash-removal step.

“APC™ Flash-Free Adhesive exceeded my expectations. There was zero drift. I inspected all corners of every bracket for undercuts, there were none. I am highly impressed with the amount and consistency of material from bracket to bracket and from one case to another.”

APC™ Flash-Free

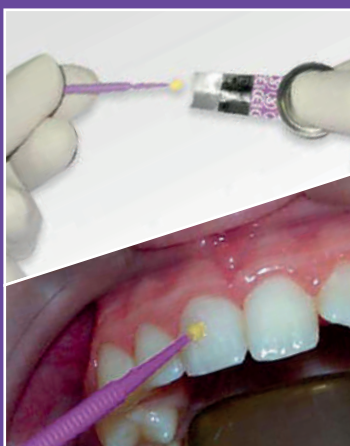

Adhesive Coated Appliance System

Powered by 3M science, APC™ Flash-Free Adhesive leverages several of the highly advanced 3M Technology Platforms such as **nanotechnology, adhesives and nonwoven materials** to create the innovative design of the APC™ Flash-Free Adhesive bonding substrate. With an extensive scientific background, 3M is uniquely positioned to bring advancements such as this to orthodontics.

Simple, efficient bonding process.

1. Etch & Prime

2. Pick & Place

3. Cure & Done

APC™ Flash-Free

Adhesive Coated Appliance System

Now available on three appliance choices, for complete 7x7 bonding with APC™ Flash-Free Adhesive.

As a complete flash-free practice, you can use one simple technique that offers maximum efficiency and convenience for both staff and patient.

Clarity™ ADVANCED Ceramic Brackets:
Aesthetic, low profile treatment.

Victory Series™ Low Profile Brackets:
Proven low profile treatment choice worldwide.

Victory Series™ Superior Fit Buccal Tubes:
Optimized design delivers better tooth-to-base fit, improved handling and efficiency in treatment.

Enhanced efficiency through smart delivery systems.

1. ORDERING EFFICIENCY

Convenient single case kit ready to dispense.

5-pack box.

Individually sealed single-use blister packs are easily identified by bracket type and are coded for traceability.

2. CHAIRSIDE EFFICIENCY

Set up tray for efficient delivery to chairside.

Correctly oriented for easy pick up and placement.

3. OFFICE EFFICIENCY

Wall mount storage unit.

Inventory dispensing drawers for ease of use.

The perfect accompaniment.

Combine APC™ Flash-Free Adhesive with *Transbond™ Plus Self Etching Primer* and *Ortholux™ Luminous Curing Light* for a simplified and efficient bonding procedure.
