

Know your hazard: Lead

What is lead?

Elemental lead is a soft and yet dense, silver-grey metal that is highly malleable. Inorganic lead and lead compounds are used extensively throughout industry. Industrial processes may generate **lead dust, fumes, or vapours**, which are hazardous to health.

Where is lead used?

Lead is utilised in metal production, metal fabrication and related applications, such as:

Sources of exposure to lead

Workers are exposed to lead during the production and processing of elemental lead and its alloys. They can be affected by:

Harmful effects of lead

Exposure to lead in the workplace can occur through inhalation and ingestion. The health effects may vary from acute to chronic:

Acute effects:

Chronic exposure can cause:

Lead and inorganic lead compounds are classified as probably carcinogenic to humans (Group 2A) by the IARC** and as confirmed animal carcinogens by the ACGIH**.

How can one protect against it?

In order to reduce exposure and risks to workers, you can:

What RPE does 3M recommend for protection against lead?

3M has a range of RPE that can help reduce your exposure to dusts, mists, metal fume, as well as gases and vapours commonly encountered in metal production and fabrication.

Type of Respirators	Recommended 3M Respiratory Protective Equipment***		
 Powered Air Respirator	 3M™ Versaflo™ Heavy Industry PAPR Kit, TR-600E-HIK	 3M™ Versaflo™ Particulate Filter, TR-6710E for TR-600 PAPR	 3M™ Versaflo™ ABE2K1HgP Filter TR-6580E for TR-600 PAPR
 Supplied Air Respirator	 3M™ Versaflo™ Vortex Cooling Assembly V-100		
 Reusable Respirator	 3M™ Secure Click™ Full Facepiece Reusable Respirator FF-800 or Half Facepiece HF-800 Series	 3M™ Secure Click™ Particulate Filter D3138, P3 R, with Nuisance Level Organic Vapour/Acid Gas Relief and Ozone	
 Disposable Respirator	 3M™ Particulate Respirator 8511, N95	 3M™ Particulate Respirator for Welding 8515, N95	

*Hot work processes include cutting, grinding, and even polishing metals, which can create particles of metal and metal oxides that can be inhaled.
**The International Agency for Research on Cancer (IARC) and the American Conference of Governmental Industrial Hygienists (ACGIH) are organizations involved in cancer research and occupational health.
***This is only recommendation for minimum PPE required. Each work application must be evaluated by a competent person as required by local law and regulation for the hazard and risk before selection of right PPE. Workplace rules and regulations must take precedent, if more stringent.
