WHAT IS A MASTERPIECE?

A masterpiece improves the lives of all who experience it.

They are the objects of beauty inspired by nature and materials at hand — wood, textile, stone, leather, metal — and are limited only by the imagination of the master. 3M™ DI-NOC™ Architectural Finishes bring you the beauty of hundreds of natural elements with additional designs to inspire your masterpiece. We use advancements in science, so you can capture the world's natural beauty without sacrificing your creative ideals.

We're not only inspired by nature, but we strive to protect it by challenging ourselves to develop more sustainable solutions without sacrificing on beauty. Our latest innovations contain select designs with a release liner made from 40% recycled paper content and new earth tone designs made in part from crushed seashells and post-consumer recycled polyester. With 3M™ DI-NOC™ Architectural Finishes, you can create a stunning new space quickly and easily, extending the life of fixtures or breathe new life into an existing space almost overnight. The non-porous surface of DI-NOC™ Architectural Finishes is not just beautiful, but easy to maintain, clean and disinfect. There are no boundaries. No limits. Only your imagination. Create your masterpiece.

3M™ DI-NOC™ Architectural Finishes AR Series Abrasion Resistant

Excellent Abrasion Resistance

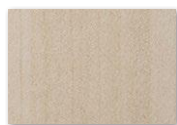

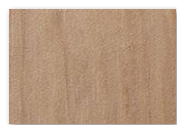

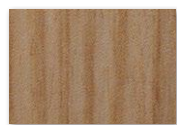

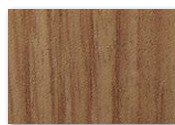

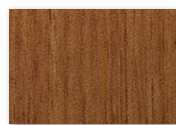

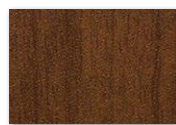

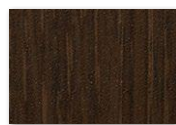

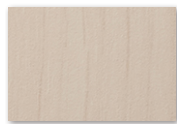

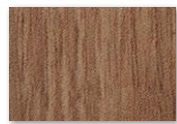

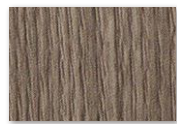

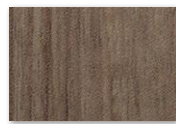

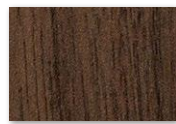

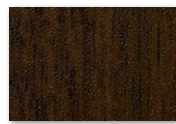

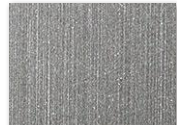

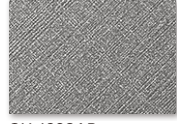

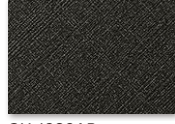

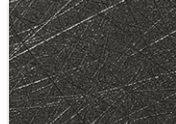

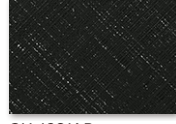

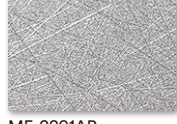

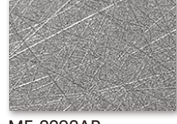

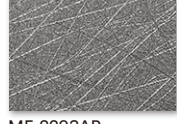

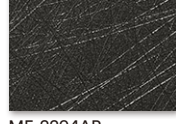

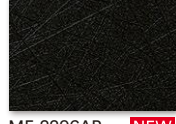

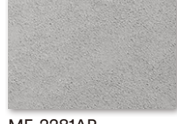

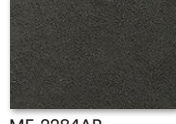

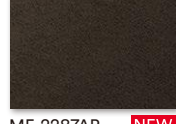

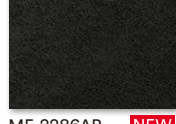

Standard 3M™ DI-NOC™ Architectural Finishes provide good abrasion resistance in most applications. For areas that experience heavier wear and tear, we recommend our AR Series Abrasion Resistant, which is a great solution with excellent surface abrasion resistance and scratch resistance. This allows the finish to maintain its aesthetic appearance, ultimately extending the lifespan of the space.

ME-2297AR **NEW**

◀ Try scratching the surface with a coin.

Even after scratching, AR Series remains intact and maintains its aesthetic appearance.

3M™ DI-NOC™ Architectural Finishes

EX Series for Exterior

Enable an entirely new appearance to existing exterior elements

The 3M™ DI-NOC™ Architectural Finishes EX Series for exterior applications are durable, dimensionally stable, and weather resistant surface finishes. They can be applied directly on smooth, non-porous application surfaces and are designed to maintain a consistent finish and color, despite the UV exposure and other weather conditions.

Extensive palette of patterns

Choose from 58 different designs, available mostly in wood grain and metallic patterns or make to order the DI-NOC™ Architectural Finishes EX Series in more than 100 different 3M™ DI-NOC™ Architectural Finishes Standard Series.

Excellent weather resistance

Exterior warranty ranges from 3 to 14 years, depending on the climate and installation location. Contact 3M Technical Support for detailed warranty information.

Easy to Install

The EX Series is an adhesive-backed film with a thickness of approximately 0.2 mm. It is easy to cut with a cutter knife, making it suitable for on-site work.

Combine exterior and interior designs

Create a sense of unity between interior and exterior surfaces by using DI-NOC™ Architectural Finishes Standard Series and DI-NOC™ Architectural Finishes EX Series with the same design.

3M™ DI-NOC™ Architectural Finishes

TIL Series for Application to Tile

Quickly bring new life and design to your tiled walls without demolition

3M™ DI-NOC™ Architectural Finishes TIL Series is designed for application to tiled wall surfaces. Composite film is made with a conformable metal foil designed for the refurbishment of damaged tiled wall surfaces or tiles displaying cracks, dirt, or mold.

Restroom refurbishment / ST-024TIL

Suitable for tiled walls with grout between tiles.

You can update the look of existing tile surfaces with minimal disruption.

- 3M™ Comply™ adhesive for fast, easy, air bubble-free installations
- High adhesion to tiled surfaces.

Quick Installation

This product gives a gamechanging, rejuvenated look just by applying film over a tiled surface, substantially lowering work time and costs, when compared to conventional replacement of an entire tiled surface.

Easy to Clean and Maintain

Film is easy to apply over existing tile and conforms into grout areas. It's easy to clean the entire surface including the covered grout. Fast and inexpensive to repair, when compared to expensive tile replacement.

Quality and Durability

Excellent design, water resistance, and durability properties.

⊠ This product is manufactured to order. Contact your local 3M sales rep to learn more on its lead time and minimum order quantity
 ⊗ Product conforms into grout between tiles. DO NOT apply to 3D compound curved surfaces.

3M™ DI-NOC™ Architectural Finishes

Whiteboard Film

Transform Surfaces into Communication Spaces

3M™ DI-NOC™ Whiteboard Film is a unique architectural finish that can convert interior surfaces into creative and collaborative environments. Compatible with most dry erase markers.

Writing

WH-111 offers excellent writing and erasing performance with a glossy surface.

WH-111 ⊗ US/CA/EU

Writing and Projection

PWF-500 provides both whiteboard and projection capabilities, with the matte surface providing minimal glare from a projector.

3M™ DI-NOC™ Architectural Finishes

Sustainable Framework

Enabling a more Circular Economy with material, science and design.

1. Remodel and reuse

- Versatile application and conformability - Can be applied to most interior surfaces, from flat to curved, to enhance or refresh the design.
- Allows reuse / resurfacing / remodeling of existing structures
- Contribute to extending building life cycle
- Obtain LEEDv4 building credits - Building owners can use 3M™ DI-NOC™ Architectural Finishes to acquire LEEDv4 building credits for:
 1. Interior Life Cycle Impact Reduction
 2. Construction and Demolition Waste Management
 3. Low Emitting Materials
 4. Building Life Cycle Impact Reduction
 5. Furniture & Medical Furnishings
 6. Facility Maintenance and Renovation

3. Embodying the beautiful quality of natural resources through superior texturing technology and design variety

- Avoids cost of purchasing new construction materials
- Simulate the appearance of natural materials
- Creativity is never compromised with a selection from 900+ designs

2. Reduction of construction waste and shipping volume

- The film is thin, light, rollable, and flexible, making it more compact to transport than traditional construction material
- Reduces the need for demolition/ rebuilding of fixtures
- Helps reduce landfill/incineration of existing building fixtures

4. Excellent durability and maintainability

- The product has been tested for flammability per regional requirements and can be used in a wide range of interior architectural applications.
- Resistant to abrasion, impact, stains, chemicals, and UV light
- Easily cleaned as a non-porous surface with typical cleaners and disinfectants. *Please consult the Technical Data Sheet for additional technical information

📦 This product is manufactured to order. Contact your local 3M sales rep to learn more on its lead time and minimum order quantity
 ⊗ Application to simple curves and around straight edges is possible. DO NOT apply to 3D compound curved surfaces.

3M™ DI-NOC™ Architectural Finishes E-Series PO Polyolefin Film

Help you meet your goals without sacrificing your vision.

The New E-Series PO collection offers an alternative for those that seek to go further. Find your own way and make a statement through our variety of patterns and textures. This product is made with approximately 99.5% non-PVC (non-vinyl) materials.

Available as make to order. *Standard Series and E-Series PO Polyolefin Film have a similar appearance but are not identical.

Design Towards Sustainability

Recycled content liner

3M™ DI-NOC™ Architectural Finishes E-Series RC Recycled Content*** Film, E-Series PO Polyolefin Film and select designs* have a poly coated paper release liner made with 40% recycled pulp as base paper. Liner printed with ink containing 10% biomass derived material.

*Contact 3M for a list of designs.

Sample book

Cover made from 100% recycled paper and pages made from 50% recycled paper, all printed with vegetable oil based ink.

Options without phthalate plasticizer

3M™ DI-NOC™ Architectural Finishes Metallic Palette Series products manufactured after 2024 do not contain intentionally added phthalate plasticizer. P28

**Samples on this book are for visual assessment only.

E-Series RC Recycled Content*** Film

3M™ DI-NOC™ Architectural Finishes E-Series RC Recycled Content*** Film products are made in part with recycled polyester and bio-based material. P18~19

***E-Series Recycled Content Film has a base film layer made with 80% post-consumer recycled polyester and a colored layer made with 20% scallop shell powder as a bio-based filler.

2024 New Products : Explore our most recent collections

E-Series RC P.18~
Recycled Content* Film

The E-Series RC offers clients more options as they pursue their sustainability goals. This is achieved by incorporating beautiful earth tones created in part from seashells and recycled polyester, bringing a bit of the sea to your walls.

*E-Series Recycled Content Film has a base film layer made with 80% post-consumer recycled polyester and a colored layer made with 20% scallop shell powder as a bio-based filler.

E-Series PO P.15~
Polyolefin Film

The New E-Series PO collection offers an alternative for those that seek to go further. Find your own way and make a statement through our variety of patterns and textures. This product is made with approximately 99.5% non-PVC (non-vinyl) materials.

AR Series P.6~
Abrasion Resistant

Extend the life of your designs in heavy traffic areas with this revolutionary series, a solution tailor-made for spaces affected by the burdens of wear and tear.

TIL Series P.10~
for Tile Application

Bring new life and color quickly to your tiled walls. TIL Series is designed for tiled wall applications surfaces, such as bathrooms. You can update the look of existing tile surfaces with minimal facility disruption.

Wood

P.52~

Step into a world of creative possibility, where nostalgia, resilience, and comfort converge to inspire your visionary designs. Our collection includes a range of looks from common to rare woods species, inviting guests into an atmosphere of warm comfort.

Metal

P.20~

Attain your design vision with our 'Metal Series'. Create more sophisticated spaces with process driven metal surfaces that achieve authentic expressions without the extra cost and maintenance. It's your choice. It has been expanded to include the latest trends via vibrational texture, optical mesh, oxidized metals.

Stone

P.32~

Make your luxurious design vision come true and within budget with our latest Stone Collection. We seamlessly blended captivating details that feel like they were extracted directly from nature.

Concrete, Stucco

P.36~

Bring out the artist inside you and make your vision come true with our Concrete & Stucco collection, where we seamlessly blend captivating natural elements. Our designs include multiple handcrafted finishes, inviting guests into an atmosphere rich in the traditions of craftsmanship.

Versatile wood grain series that expands design possibilities

You can choose the perfect color, design, texture, and function for your space from our extensive line of over 400 products.

Premium Wood **MT** P.54~

The highest grade Premium Wood Series expresses the realistic appearance and texture of natural wood. The controlled reflection of the matte coating is combined with both fine and deep wood grain embossing and high quality printing. This unique technology creates the optimum tone and texture of each species of wood.

Controlled Reflection Technology :

PW-2322MT

Dry Wood **MT** P.56~

The matte coating technology on the Dry Wood Series offers a smooth texture to the touch. The diffuse reflection without luster expresses the realistic appearance of high quality solid wood.

Matte Coating Technology :

DW-2215MT

Fine Wood P.62~

The Fine Wood Series provides the realistic expression of wood grain by variations high quality printing and embossing for each design. The grains in the wood are created by special printing coordinated with embossing.

FW-338

Wood Grain P.71~

The Wood Grain Series offers the appearance of a wide variety of wood species and colors at a reasonable price. The WG GN designs have a high quality gloss finish.

WG-2464

AR Series Abrasion Resistant **⚡** P.6~

The AR Series has an abrasion resistant top layer to reduce the visibility of scratches in high traffic areas and realistic wood grain embossing.

FW-338AR

EX Series for Exteriors **☀** P.8~

The EX Series wood grain designs are durable, dimensionally stable, and weather resistant for application to smooth, non porous exterior surfaces. They maintain a consistent finish and color, despite UV exposure and other conditions.

Matte Coating Technology :

The new Matte Series utilizes the latest technology available. With a new state of the art matte surface, the Matte Series offers realistic texture by converting incident light into diffuse reflection and suppressing specular reflection. This series also provides fingerprint resistance. Explore the new world of design possibilities with 3M Matte Series.

Diffuse Reflection

The new state of the art matte surface converts incident light into diffuse reflection, providing very low gloss and a deep, high quality matte texture.

Fingerprint Resistant

The matte texture provides fingerprint resistance, reducing the visibility of fingerprints with an easy to maintain surface.

Tactile Feature

A realistic matte texture is created by combining the matte coating technology with high definition embossing technology.

Experience the difference in texture between standard series and new Matte Series
