

**Immediate Action Required** 

## Products: Select 7350T-5/16" Quick Link

3M is issuing this "Stop Use & Inspect" notice for 3M™ Protecta® Swiveling Web Rebar/Positioning Lanyard 1351001, 2 ft (3M ID 7012817415)

As part of 3M's ongoing commitment to delivering high quality products, we are notifying our customers of the following information related to a supplied raw material issue related to a small number of 7350T-5/16" quick links. 3M has identified variable working load limit performance in a single lot of 5/16" quick links that are used on select 3M™ Protecta® Swiveling Web Rebar/Positioning Lanyard 1351001, 2 ft. The potentially affected materials were produced between Dec 18, 2024 and February 12, 2025. **3M has determined that in the event of a fall and under certain conditions, these devices may not hold the load as expected which could expose the worker to serious injury or death.** There are no current reports of injuries or accidents related to these materials.

Due to this, we are sending out this Stop Use and Inspect Notice. Any affected products should be removed from service immediately so the inspection can be performed. **Failure to read and follow all instructions associated with this Notice may result in serious injury or death of a user.** Instructions for appropriate next steps are below, see the appendix for a complete list of models impacted by this stop use/inspect notice.

## End Users

**Step 1:** Locate the model number and manufacture date on the device information label (see Figure 1). If your device model number is listed in the appendix and it was manufactured between Dec 18, 2024 and Feb 12, 2025 proceed to step 2. Devices with model numbers not listed in the appendix or not built during the affected time range are not impacted by this notice, and may be returned to service.

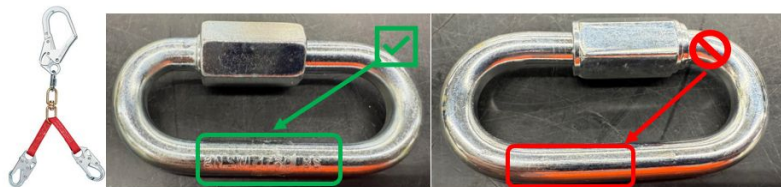

**Figure 1: Device information label displaying Manufacture Date and Model Number**

**Step 2:** For Rebar/Positioning Lanyards: Find and inspect the quick links attached to the hooks. There should be two quick links on any affected models. Affected quick links will not have any Safe Working Load (SWL) stamped on them (see Figure 2). If quick link is

stamped with either “SWL 1540LBS” or “SWL 1760LBS” the product is not affected, it can continue to be used. **If quick link is not stamped, the product is affected, proceed to Step 3.**

**Figure 2: Check the quick link for stamped “SWL 1540LBS” or “SWL 1760LBS”, parts with no stamping on either side are affected and should be removed from service.**

**Step 3:** Contact your distributor to return your product for credit at 3M’s expense.

## Distributors

Upon receipt of this Notice, please contact your 3M Fall Specialist for a listing of the impacted products sold to you. If you have any of the impacted select 3M™ Protecta® Swiveling Web Rebar/Positioning Lanyard in stock, please contact Customer Issue Resolution ([3msupport.crcsibgreturns@mmm.com](mailto:3msupport.crcsibgreturns@mmm.com) or 1-855-724-4408, option #2) to submit a Return Material Authorization.
