

WHERE FLEXIBILITY MEETS PRECISION.

INTRODUCING SCOTCH-BRITE™ PRECISION RADIAL BRISTLE BRUSH

With 3M
Precision-
Shaped Grain

The Scotch-Brite™ Precision Radial Bristle Brush features 3M Precision-Shaped Grain for increased cut rate without sacrificing finish. Bringing a new level of productivity and abrasive life to the Scotch-Brite™ lineup while maintaining its unique attributes of conformability and consistency to deliver repeatable results.

Scotch-Brite™ Precision Radial Bristle Brush

This brush is extremely adaptable, conformable, and cleans with minimal pressure — making it ideal for manual and robotic processes.

- ▶ **Molded, abrasive-filled bristles deliver consistency while finishing, cleaning, blending, and deburring**
- ▶ **This wire brush alternative contains no wire filaments to help enhance user safety**
- ▶ **Conformable bristles require less operator manipulation**
- ▶ **Flexible bristles produce uniform finishes around protrusions, detail grooves, patterns, and other hard to reach areas**
- ▶ **Conformability allows abrasive to stay in contact with complex-shaped parts in robotic processing**
- ▶ **Ideal industries include fabricated metal, industrial machinery and equipment, electronics, automotive, and aerospace**
- ▶ **Available in 50+, 80+, and 120+ grade options**

Types of Bristles:

Straight - Type S
Rigid and very aggressive for cleaning and deburring, non-directional.

Angled - Type A
Rigid and very aggressive, similar to Type S but for smaller diameters, directional.

Curved - Type C
Less aggressive and more conformable, directional.
