Phase In – Phase Out of 3M™ Versaflo™ Supplied Air Valves and Configurations

Dear Customer:

We are simplifying the 3M™ Supplied Air Line valve products by expanding the functionality of the V-300 and V-400 with the introduction of a new easy to use adapter, the 3M™ Versaflo™ Supplied Air Adapter V-399, for Tight Fitting Facepieces. The V-399 Adapter is designed to be utilized with the V-300 and V-400 series valves to connect tight fitting breathing tubes and certain tight fitting facepieces.

V-399 Adapter

V-300 Valve

As a result, the current SA and W series valves will be phased-out at the time of the introduction of the V-399 Adapter. To assist you with this transition, below is a list of potential alternative products that you can evaluate and determine whether they are suitable for your intended application. Please see Table 1 below for phase out skus and suggested alternatives.

3M will plan to discontinue the product(s) on the date indicated and / or until current inventory has been depleted. 3M reserves the right to accept or reject purchase orders for these discontinued products. All open orders will be canceled after inventory is depleted.

Changes outlined in this communication will go into effect on 30-Jun-2025.

Please reach out to your local 3M representative or 3M Technical Service 1-800-243-4630 with any questions you may have about this exciting product launch.

With the information contained in this communication, please update your ordering systems. No returns will be accepted for discontinued product unless the return is based on a valid warranty claim or due to a 3M error.

For questions regarding orders, please reach out to 3M Customer Service or view order status on 3M's bCom portal. For any other questions please contact your 3M Sales Representative. We apologize for any inconvenience this may cause and thank you for your continued support of 3M products.

Sincerely,

Personal Safety Division

Warning: These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the User Instructions provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134, including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For correct use, consult supervisor and User Instructions, or call 3M PSD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.
