

# 133 million reasons to protect patient data.

- In 2023, over 133 million healthcare records were exposed in data breaches.<sup>1</sup>
- Office of Inspector General (OIG) recommend expanding HIPAA audits to assess physical safeguard compliance in protecting Protected Health Information (PHI) where it is created, received, maintained, transmitted or viewed.<sup>2</sup>
- Regulators are preparing a new wave of health information audits.<sup>3</sup>
- HIPAA, HITECH and state regulations all call out for Healthcare entities to take reasonable measures to protect & prevent the unintentional use or disclosure of PHI.
- A 3M™ Privacy Filter is a cost-effective way to ensure compliance with state and federal laws.

## Healthcare Key Risk Areas

## 3M™ COMPLY™ Magnetic Attach Privacy Filter for Full Screen Monitors

- Ideal for healthcare offices, Computers on Wheels (COWs), nurse's stations and other high traffic areas.
- Flush fit to screen to provide crisp, clear view of your screen – preventing visual defects or ghosting
- Ultra-strong magnets to hold filter securely in place ensuring PHI remains confidential
- Reversible between glossy and glare-reducing matte side to help reduce reflections and hide fingerprints.
- 3M™ Privacy Filters with COMPLY™ Magnetic Attach have been tested and are compatible with many common hospital-use disinfectants.

Plus, wipe clean with virtually no damage, hundreds of times.
