Supplied Air-Valves. Versatile, Comfortable Protection.

3M™ Versaflo™ Supplied Air Valves

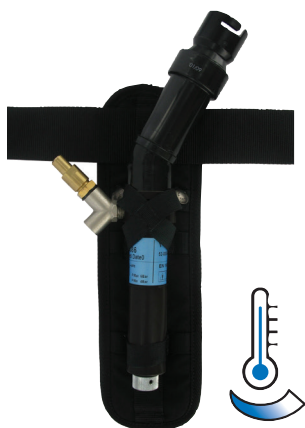

*Model and product configurations shown may differ depending upon region.

Continuous comfort. Supplied air you can rely on the whole day.

3M™ Versaflo™ Supplied Air systems help protect your workers from a variety of airborne contaminants while helping to maintain comfort. 3M™ Versaflo™ Supplied Air Regulators offer protection against dust, mist, fumes, gases or vapours and combination hazards e.g. paint spray. Supplied Air Regulators do not offer protection in confined spaces, oxygen deficient atmospheres or for asbestos stripping.

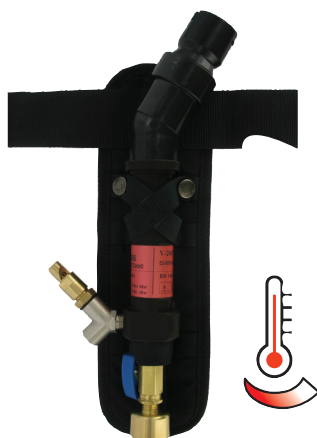

Find the right valve for your environments.

Whether you need a valve to cool, heat or just regulate the incoming compressed airflow on the job, our line of supplied air valves can help meet your workers needs.

3M™ Versaflo™ Supplied Air Cooling Valve V-100E

3M™ Versaflo™ Regulators V-100E and V-200E allow users to either cool (V-100E) or heat (V-200E) the air by as much as 28°C, making them a good choice for workers exposed to uncomfortably hot or cold temperatures.

3M™ Versaflo™ Supplied Air Heating Valve V-200E

3M™ Versaflo™ Supplied Air Regulator V-500E

Balanced regulator specifically designed for respirator use, the Versaflo V-500E Regulator ensures smooth airflow, safety and comfort.

Designed for comfort. Powered by innovation.

We developed 3M™ Versaflo™ series Supplied Air Valves to deliver the safety you need, with the comfort and ease you've been looking for.

Comfort

Temperature and airflow can be adjusted for worker needs.

Ease

Easy to buy, easy to maintain and easy to use with your Versaflo headtops and breathing tubes that you already use with your Versaflo supplied air valve.

Versatility

Use in a variety of industries and applications, 3M supplied air systems provide options for user comfort and cost effectiveness for a range of environments.

Easy to use. Easy to buy.

Complete CE-approved supplied air systems require a specific configuration of supplied air hose, air regulating valve assembly, breathing tube, and helmet or hood.

Just getting started? Choose a full kit.

For some of the most common applications, we've collected the most common components into convenient kits.

Heavy Industry Kit

For use in rugged industrial environments like demolition, grinding, metal finishing and casting.

- ▶ V-500E-HIK

Painter's Hood Kit

Lighweight hood with premium head suspension and inner shroud provides head, eye, neck and shoulder coverage for painting applications.

- ▶ V-500E-PHK

Air Filtration Units. Designed to work for you.

3M™ Aircare™ Filtration Unit provides high quality air from an external source of compressed air by removing water and oil droplets, solid particles and odours. The unit removes condensation and contamination from within the air system before it is delivered to the user.
