

3M Science.
Applied to Life.™

Take control of your adhesive dispensing process.

3M™ Adhesive Mix Monitor

Two-part adhesives, simplified.

The 3M™ Adhesive Mix Monitor is a proprietary technology using a disposable sensor that integrates seamlessly with your dispensing equipment to collect measurements **after** your adhesive is mixed and **before** it's dispensed onto your parts. It converts measurements into data and displays alerts on the processing unit or streams them to another device – so you get real-time feedback wherever you are. With a simple red or green light, the operator will know whether to stop or go. A breakthrough approach to quality control.

Adhesive dispensing you can trust.

With the 3M™ Adhesive Mix Monitor, you can gain confidence in your dispensing process like never before.

Get real-time data about mix quality, temperature, time and error events.

Simplify your process and get to work faster by minimising excessive quality control checks on your adhesive dispenser.

Know the moment an issue takes place, so you can correct it before it causes costly scrap or rework.

Improve quality control and traceability by being able to tie the adhesive to the part it was dispensed on.

Minimise waste with notifications about when and how much adhesive to purge.

Rest assured that your adhesive will be mixed as you expect.

Use data to gain visibility into your adhesive dispensing process from anywhere you are in the world.

Simplify your process.

The 3M™ Adhesive Mix Monitor can help streamline your mixing and dispensing process to increase efficiency and uptime.

- ▶ Works with many 3M two-part structural adhesives
- ▶ Easy to set up and has a small footprint
- ▶ Requires only a few pieces and minimal investment
- ▶ Clearly indicates status of mixture with a red light or green light

Trace problems to their source.

The 3M™ Adhesive Mix Monitor gives you better control over your whole process.

- ▶ The first system to track and record adhesive mix ratio
- ▶ Continuous real-time feedback delivered wherever you need it
- ▶ Objective measurements to help improve consistency

Integrates seamlessly into virtually any existing adhesive dispensing process.

The 3M™ Adhesive Mix Monitor helps you take control over your two-part adhesive process, whether you're trying to reduce waste and rework or increase efficiency and uptime by simplifying your dispensing process.

Important note

Product selection and use: Many factors beyond 3M's control and uniquely within users' knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customers' application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., EU OHS legislation, Management of Health and Safety at Work Regulations 1999 etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property.

Warranty, limited remedy and disclaimer: Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

Limitation of liability: Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.
