

Why 3M Training?

When it comes to protecting your work site, we deliver. At 3M Safety Training, we understand workers' lives are on the line every day, but ensuring their safety starts long before the job begins.

Based on more than 70 years of expertise and jobsite implementation around the globe we are perfectly positioned to provide training in wind industry. Invest in 3M Safety Training and be confident that your colleagues will receive their training from a truly expert team.

GWO Certified Wind Industry Training Courses

Global Wind Organisation (GWO) is a non-profit association of leading renewable energy manufacturers, owners, and operators. Its training standards define the requirements for industry-recommended courses are developed for renewable energy technicians working in construction, installation, operations and maintenance. 3M is one of the certified training providers and individuals who complete GWO courses are recognised as competent and knowledgeable for the relevant training standard.

These courses have been designed for supervisors and operational personnel to properly assess and make educated decisions to work safely and emergency response procedures in critical situations. Practical demonstrations, hands-on training and theoretical assessment ensure our courses build confidence and enhance safety competence.

Certificate
issued by GWO
upon
completion
