## **Public Advisory Notice on Counterfeit Products**

3M is committed to delivering high-performance products and solutions globally. We understand that quality is essential, and we believe every customer deserves to receive a genuine 3M product-every time.

The most effective way to avoid purchasing counterfeit products is to buy only from local 3M authorized distributors and dealers. Doing so provides the highest assurance that you are receiving authentic 3M products. 3M applies stringent criteria when appointing distributors and conducts annual audits and training sessions with certified installers to help ensure consistency in application quality. This is essential to maintaining the warranted durability of our products. Through authorized dealers, 3M provides a manufacturer's warranty issued directly by 3M as our formal commitment to you.

To ensure product authenticity, 3M may perform verification procedures on products purchased in the market. As part of this process, 3M reserves the right to reject any items found to be counterfeit or sourced through unauthorized channels, which would void the warranty.

3M endorses the supply of genuine products exclusively through our authorized distributors and dealers. You may visit the 3M Philippines website to locate the authorized dealer nearest you.

If you have information regarding the sale or distribution of suspected counterfeit 3M products, please report it immediately to 3M Philippines using the contact details provided below, or submit a report through 3M Verify using the link indicated.
