NOTICE: 3M™ Automotive Aftermarket Division Cutting and Grinding Portfolio - New Product Introduction and Discontinuations with Suggested Alternatives

Dear Valued Customer,

At 3M, we continuously review our product offerings to determine where we can better meet our customers' needs. As part of this process, we are pleased to introduce new 3M™ Cubitron™ 3 Cutting and Grinding Abrasives for the Body Shop. 3M™ Cubitron™ 3 File Belts, Roloc™ Abrasive Fibre Discs, and Fibre Discs will replace the legacy 3M™ Cubitron™ II versions to keep a simplified portfolio for collision repair customers. With re-engineered precision-shaped grain, 3M™ Cubitron™ 3 products help shops get more done with less effort – more material removed by at least up to 1.2x* and sustained higher cut rate by at least up to 1.4x* compared to our previous technology. As a result, the 3M Part #(s) listed below will be discontinued with listed suggested alternatives.

Changes outlined in this communication will go into effect on 18-May-2026, or while supplies last.

3M will accept orders submitted up to the date indicated. However, 3M reserves the right to accept or reject purchase orders for these products if fulfillment is not possible due to high demand or other factors.

To assist you with this transition, below is a list of potential alternative products that you can evaluate and determine whether they are suitable for your intended application. With the information contained in this communication, please update your ordering systems with the new 3M Stock #'s, as applicable.

For questions regarding orders, please reach out to 3M Customer Service or view order status on 3M's bCom portal. For any other questions please contact your 3M Sales Representative.

Sincerely,

Dave Wilk
Country Business Leader - USAC
Automotive Aftermarket Division

**All based upon 3M internal automated testing against corresponding 3M™ Cubitron™ II products.*
