

Cubitron™ 3
Performance Abrasives

Enter the new era of abrasive performance

**Get more done, with less effort:
3M™ Cubitron™ 3 Abrasives for
the body shop.**

Re-engineered precision-shaped grain
helps remove more material faster,
boosting productivity.

The Evolution of Precision-Shaped Grains

Re-shaping the way work gets done.

Our latest development of 3M™ Cubitron™ 3 Precision-Shaped Grain
Re-engineered precision-shaped ceramic grain using a proprietary breakthrough in grain shape with curved sides. This helps increase productivity and lower overall grinding costs.

Re-engineered Precision-Shaped Grain
Cut-Off Wheels are built with the re-engineered 3M™ Cubitron™ 3 Precision-Shaped Grain paired with proprietary molecular bonding technology to further enhance performance.

3M Precision-Shaped Grain
3M pioneered the first precision-shaped grain using 3M microreplication technology to form consistent sharp peaks that easily “slice” through metal—cutting cooler, faster, and lasting longer than conventional abrasive grain.

Conventional Ceramic Abrasive
Conventional ceramic abrasive grain tends to “plow” through metal, causing heat to build up in the workpiece and abrasive, resulting in a slower cut and shorter abrasive life compared to our latest precision-shaped grain.

3M™ Cubitron™ 3 File Belts

Used with the 3M™ File Belt Sander, easily grinds out rivets and spot welds

Sustained cut rate higher by up to

1.8x*

More material removal by up to

1.5x*
