

3M™ Endorsed Building Window Film Installer Advanced Training with final exam

In our training centre, you can expect theoretical and practical content on the installation of flat glass films on buildings and project planning for the applications mentioned.

Prerequisites for participation:

- Experienced, active film applicators in the field of building films (with at least 2 years of professional experience)
- Traders or employed by a specialist company
- Large-area installation is practiced, especially the handling of full material widths
- Basic film knowledge (product properties and differentiation, application knowledge, understanding and effects of external influencing factors) is available

Learning objectives:

- Correct preparation and cleaning of windows including frames
- Defect-free installation without water bubbles, creases, dust inclusions, etc.
- Butt join installation, for safe handling of large film surfaces.
- 180° rotation for butt join installations
- Risk-free cutting techniques on glass
- Edge sealing (sun protection films)
- Edge bonding IPA (safety films)
- Correct removal of Building Window Films (BWF)
- Learning and understanding the different application methods
- Selection of suitable materials for the requirements of the project
- Knowledge of the assessment criteria and requirements for certification (combined procedure of endorsed training module and subsequent project acceptance)

Training duration:

Start: 1st day, at 9.00 a.m.
End: 3rd day, approx. 5 p.m.

Training program:

Day 1: Theory and trainer demo in the morning, practice in the afternoon
Day 2: Practice

Day 3: theoretical and practical assessment

Participants learn in depth about the technical and legal requirements and framework conditions for working with Building Window Films as well as all the necessary processing techniques on the building.

On the third day, the skills learned are tested in practice using standardized exercises and the result is assessed. The theoretical basics are tested in a written examination.

This is followed by an individual feedback session in which the results are discussed, strengths and weaknesses are analysed and suggestions for improvement are made. This ensures that the required methodological skills are available at the end of the training. The qualitative implementation then requires multiple repetitions in practice.

Each participant receives the 3M™ Endorsed Building Window Film Installer certificate after successfully completing the assessment.

Successful completion of the assessment is a prerequisite for 3M Select certification of your company. In addition, a company audit of the specialist company is required in any case.

The certification of the specialist company as a 3M™ Certified Building Window Film Installer (prerequisite: at least 1 certified 3M™ Endorsed Building Window Film Installer in the specialist company) is carried out on the actually implemented project by assessing the result at least 3 weeks after implementation.

Trained range of films:

- 3M™ Prestige Series
- 3M™ Silver Series
- 3M™ Standard Safety Films

Please note:

The training is aimed at employees of specialist companies in the film installation sector.

Maximum number of participants 4 persons per training date; guaranteed implementation from 3 participants.

We ask you to pay the invoice up to 14 days before the start of the event. All registrations from participants who have not paid by 14 days before the start of the event will be cancelled and reassigned.

Cancellation free of charge up to 14 days before the start of the event. After that 100% of the costs will be charged.
