

3M United Kingdom Public Limited Company (3M UK Plc) Carbon Reduction Plan

Supplier Name: 3M United Kingdom Plc

Originally Issued date: 16th March 2026

Last reviewed date: 09th September 2026

Commitment to achieving net zero

3M UK Plc is committed to achieving net zero emissions by 2050

Base Year Emissions Footprint

Base year emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Base year emissions are the reference point against which emissions reduction can be measured.

Base Year: 2025	
Additional details relating to the base year emissions calculations.	
For nonfinancial and sustainability information, 3M UK Plc is included in the climate-related governance arrangements, risk identification, opportunities, and risk management process of its ultimate parent, 3M Company, headquartered in the United States. The 3M UK Plc net zero commitment base year is 2025. The 3M UK Board of Directors is informed and advises on these activities. For further details on 3M Company, see the 3M Global Impact Report and the 3M Company Nonfinancial Metrics excel file assurance, environmental, and glossary tabs at www.3M.com/sustainability. For 3M UK Plc, visit www.3m.co.uk.	
3M UK Plc base year emissions: 2025	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	22,400
Scope 2 (market based)	14,000
Scope 3, category 4 (upstream transportation & distribution)	17,500
Scope 3, category 5 (waste generated in operations)	1,060

Scope 3, category 6 (business travel)	829
Scope 3, category 7 (employee commuting)	1,590
Scope 3, category 9 (downstream transportation & distribution)	2,900
Total emissions	60,280

Current Emissions Reporting

3M UK Plc reporting year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	22,400
Scope 2 (market-based)	14,000
Scope 3, category 4 (upstream transportation & distribution)	17,500
Scope 3, category 5 (waste generated in operations)	1,060
Scope 3, category 6 (business travel)	829
Scope 3, category 7 (employee commuting)	1,590
Scope 3, category 9 (downstream transportation & distribution)	2,900
Total Emissions	60,280

Emissions Reduction Targets and Commitments

3M UK Plc base year, or the calendar year against which target process is measured, or the year in which the target was established or the net zero commitment is 2025.

3M Company achieved the first emissions reduction goal under Environmental Protection Agency (EPA) Climate Leaders, we've met, then reset, our goals to reflect our progress:

- 2015 – Set a goal to have 3M Company's scope 1 and 2 GHG emissions be at least 50% below our 2002 base year emissions by 2025.
- 2021 – Announced targets to achieve a 50% reduction in scope 1 and 2 GHG emissions by 2030 and an 80% reduction by 2040 from a 2019 base year on the way toward carbon neutrality in 3M operations.
- 2024 – The Science Based Targets initiative (SBTi) validated 3M Company's near-term 2030 targets of a 52.6% reduction in absolute scope 1 and 2 GHG emissions in alignment with the IPCC 1.5 °C pathways, and a 42% reduction in absolute scope 3 emissions.
- 2025 – 3M Company achieved a 64% reduction in scope 1 and 2 greenhouse gas emissions since 2019 and a 48% reduction in scope 3 emissions since 2021. Since 2002, 3M has reduced absolute scope 1 and 2 emissions by 90%.

And with both of the 3M Company's SBTi-validated 2030 targets achieved in 2025, 3M Company recommitted to an 80% scope 1 and 2 emissions reduction by 2040 on our way toward carbon neutrality in 3M operations.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

As a science-based company, 3M leverages technology, innovation, and collaboration to deliver reduced emissions in our operations and for our customers. We've assessed our current footprint, facility optimization, product portfolios, and key levers and technological advances. Through this assessment, we've identified a path for greenhouse gas emissions reduction targets and are actively managing them to achieve ongoing milestones.

3M has significantly reduced GHG emissions across our global operations, and we can amplify that impact by helping our customers reduce their GHG emissions through the use of our products. We have a process for developing reasonable estimates of emissions avoided by using select 3M product platforms. These platforms serve a range of industries from construction to automotive, energy, commercial retail, and more.

Currently 3M reduces GHG emissions through actions such as:

- More efficient infrastructure across our facilities, including our manufacturing and processing technologies and equipment
- Use of renewable electricity globally
- Managing our product portfolio, including conducting research and development for carbon footprint reduction
- Working across our supply chain to reduce emissions

For further details, see the 3M Global Impact Report, Climate at www.3M.com/sustainability.

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- More efficient infrastructure across our facilities, including our manufacturing and processing technologies and equipment
- Use of renewable electricity globally
- Managing our product portfolio, including conducting research and development for carbon footprint reduction
- Working across our supply chain to reduce emissions

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

3M uses the Taskforce on Climate-Related Financial Disclosures (TCFD) recommendations to assess climate risk and has been reviewed and approved by appropriate 3M management authority. Governance, strategy, risk management, and targets are addressed.

Emissions for 3M have been reported and recorded in line with the required standards, including the in accordance with the World Resources Institute (WRI)/World Business Council for Sustainable Development (WBCSD) GHG Protocol Corporate Accounting and Reporting Standard.

3M's scope 1 and 2 emissions have been reported in accordance with Streamlined Energy and Carbon Reporting (SECR) requirements, and all categories of scope 3 emissions have been third party assured and reported in line with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (scope 3) Standard.

Further information on 3M's carbon reduction efforts is available through:

- [3M.com/sustainability](https://www.3m.com/sustainability)
- [3M United Kingdom Public Limited Company filing on Gov.UK](#)

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Name: Sophia Oliphant
