

Now your patients can go
where they couldn't go before.

3M™ Scotchcast™
Wet or Dry Cast Padding.

The one cast padding that's right for either wet or dry use.

3M™ Scotchcast™ Wet or Dry Cast Padding is a hypoallergenic, synthetic cast padding that allows patients to get their cast wet. Plus, the padding can be applied using the same techniques used for synthetic or cotton cast padding.

And, there are no special techniques required for removal of the cast.

**Learn more about Scotchcast Wet or Dry Cast Padding
at the 3M booth #32–33 at NAOT 2005.**

3M Medical

from the 3M Health Care family

What clinicians will like about this cast padding.

- Product is applied the same way and has the same performance characteristics as our current padding, so you won't have to learn new application techniques.
 - Product conforms well to the area being wrapped.
 - Proven to work with 3M™ Scotchcast™ Plus Casting Tape.
- The cast may be removed using the same methods currently used in the industry.
 - No special protection needed during removal.
- Allows you to stock only one cast padding for all your patient needs.

What patients will like about this cast padding.

- Your casted patients can now enjoy the freedom to perform daily activities. They have the opportunity to shower, bathe, enjoy swimming or a whirlpool without covering their casts.
- Scotchcast Wet or Dry Cast Padding sheds water and feels comfortably dry to patient in approximately 1 to 3 hours.

If you're not attending NAOT, you can get more information about this product by calling the 3M Health Care Helpline at 1-800-228-3957.
