3M™ Imprint™ 3
VPS Impression Material

Accuracy at every step.

Imprint 3 VPS Material's impressive balance of clinically relevant properties helps you capture a highly accurate impression on the first take. It is a versatile VPS material that performs at every step of your everyday procedures.

Captures every detail.

The wash materials' superior hydrophilicity and flow allow for void-free impressions with great reproduction — even when blood and saliva are present.

Distortion-free mouth removal.

Excellent overall toughness helps Imprint 3 impressions resist tearing upon mouth removal.

Good memory for fewer retakes.

Imprint 3 material's memory allows impressions to regain their original shape after stretching during mouth removal. This almost 100% recovery reduces the chance of costly remakes.

3M™ Imprint™ 3 VPS Impression Material

- Available in a broad range of viscosities and setting times
- For 1-step and 2-step impression techniques

Your procedure, your choice.
