

3M™ Scotchcast™ Wet or Dry Cast Padding

A real breakthrough for the real world

3M Medical

from the 3M Health Care family

Water
no longer
has to be
off limits
for you and
your cast.

A cast is confining enough. Shouldn't you at least have one that can go more places with you?

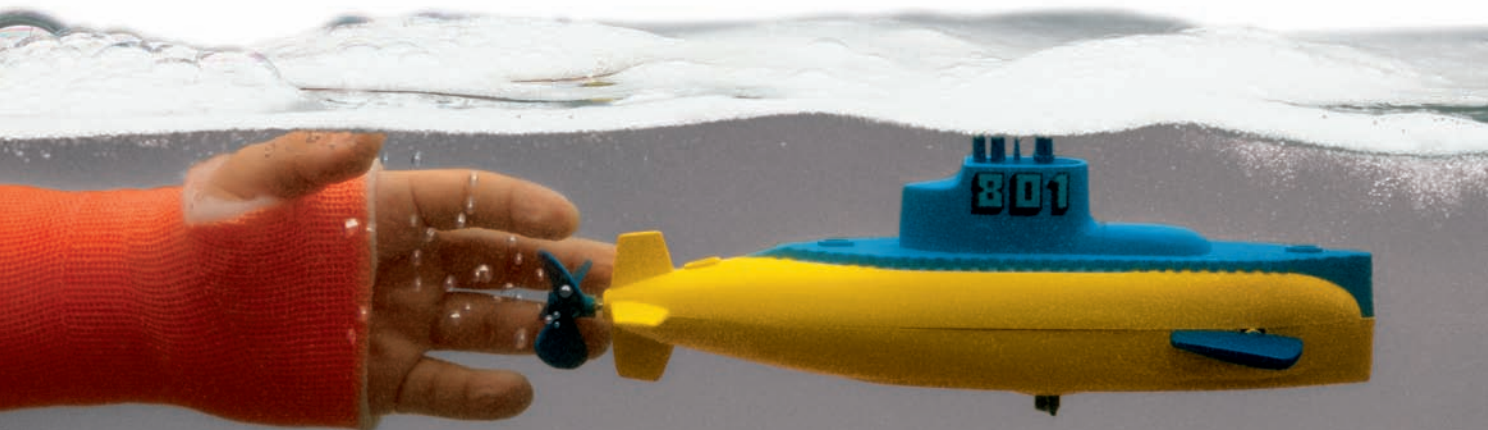

That's what 3M™ Scotchcast™ Wet or Dry Cast Padding makes possible.

Scotchcast Wet or Dry Cast Padding is a synthetic water-repellent material. Together with 3M™ Scotchcast™ Plus Casting Tape and 3M™ Cast Stockinet, it lets you completely immerse your cast without compromising the condition of your skin.

In other words, as long as you follow cast care instructions, you can shower, bathe, swim or use a whirlpool without having to wrap the cast in a waterproof cast cover.

Scotchcast Wet or Dry Cast Padding sheds water and feels comfortably dry in approximately 1 to 3 hours.

So don't let a cast hold you back. Ask your doctor about 3M™ Scotchcast™ Wet or Dry Cast Padding today.
