3M™ Tegaderm™ Non-Adherent Contact Layer

Protects the wound bed while reducing pain of dressing changes.

- Minimizes disruption of granulating tissue
- Lessens patient pain during dressing changes and removal
- Maintains an optimal moist wound environment for healing
- Indicated for both partial and full thickness wounds
- Easily cut to size
3M™ Tegaderm™ Non-Adherent Contact Layer

Provides a unique concept in wound management, rapidly transferring wound exudate into an absorbent secondary dressing. Clinical studies show Tegaderm™ Contact Layer can be left on the wound for up to seven days.

The many applications for Tegaderm™ Contact Layer include:

**Chronic Wounds**
- Vascular ulcers
- Pressure ulcers
- Cancerous lesions

**Donor Sites, Second Degree Burns and Graft Fixation**
- Donor sites
- Graft fixation

**Surgical Wounds**
- Incisions

**Traumatic Wounds**
- Abrasions
Application and Removal

Application Instructions

Step 1: Position Tegaderm™ Contact Layer over wound.

Step 2: If absorbent filler is needed, fill with 3M™ Tegaderm™ High Integrity Alginate Dressing or other suitable dressing. If moisture is needed for drier wounds, use 3M™ Tegaderm™ Hydrogel Wound Filler.

Step 3: Dress wound with appropriate secondary dressing such as 3M™ Tegaderm™ Foam Dressing (nonadhesive), a 3M™ Tegaderm™ Transparent Film Dressing, gauze or other suitable dressing. Secure secondary dressing as appropriate.

Step 4: Tegaderm™ Contact Layer may be applied under 3M™ Coban™ 2 Layer Compression System or 3M™ Coban™ Self-Adherent Wrap.

Removal Instructions

Step 1: Remove Tegaderm™ Contact Layer by gently lifting. If wound surface appears dry, first moisten material with sterile saline.
3M™ Tegaderm™ Non-Adherent Contact Layer
