

# Product Change Notice: 3M™ Chip Carrier Sockets, PLCC, 8400 Series

**Issue Number: 671**

**Date: December 15, 2006**

**To: 3M Electronic Solutions Division Global Copy List  
3M Electronic Solutions Division Authorized Distributors  
3M Electronic Solutions Division Customers**

Due to an uncontrollable RM availability issue, effective immediately, all 3M Chip Carrier Sockets, PLCC, 8400 Series, will change from a brown color to black. The SMT parts will use the same high temperature resin as before, but will be in a different color. The through-hole version will switch to another resin type that is not SMT temperature-compatible but will be adequate for wave solder applications. This affects tech sheets:

TS-2147 SMT

TS-2148 Through-hole

Product will be form, fit and function identical and will be coming from the same tooling as the current versions. All part numbers will remain the same. 3M internal SKU's will change for the through-hole parts due to the material change.

In order to provide a uniform product to our customers, we will accept returns of any unused material in exchange for the new product.
