Safety Information

Read, understand, and follow all safety information contained in these instructions prior to installation and use of the 3M™ Conversion Station Model 711 and Model 811. Retain these instructions for future reference.

Intended use

The 3M Conversion Station Model 711 and Model 811 are intended for use in converting library items that use optical barcode technology to RFID technology using 3M™ RFID tags.

The Model 711 and Model 811 are designed and intended for use in an indoor library environment. They have not been evaluated for other uses or locations.

EXPLANATION OF SIGNAL WORD CONSEQUENCES

BACKLIGHT CONTAINS MERCURY, DISPOSE ACCORDING TO LOCAL, STATE, AND FEDERAL LAWS
## WARNING

**To reduce the risk associated with hazardous voltage:**
- Do not attempt to modify or repair — no user serviceable parts inside — contact 3M Service for repair.

**To reduce the risk associated with back strain related injury:**
- Follow safe lifting procedures.

**To reduce the risk associated with a fall or machine tipping related injury:**
- Do not step or lean on any part of the Conversion Station.

## CAUTION

**To reduce the risk associated with eye related injury:**
- Do not look directly into laser scanner device;
- At the end of service life, dispose of the laser scanner in accordance with federal, state and local requirements.

**To reduce the risk associated with environmental contamination related injury:**
- The Conversion Station contains a lithium battery, mercury in the monitor/display, and circuitry that contains lead in the solder. At the end of service life, dispose of the Conversion Station in accordance with federal, state and local requirements.

## IMPORTANT NOTES

Do not bend, fold, or damage the RFID tag in any way. Such damage increases the likelihood of premature tag failure.

A rejected tag is identified with a hole punched through it. Do not use tags with holes in them.

If you receive a system message indicating that a tag cannot be programmed, that tag may be defective. Ask your conversion coordinator where to put any tags that are suspected of being un-programmable.

## IMPORTANT NOTE

The Code of Federal Regulations (CFR) 21CFR1040.10 requires the following statement for products containing lasers:
Caution—use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous laser light exposure.
FCC ID: DGF-DCS711

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CANADA ID: __________

This Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations. Cet appareil numérique de la classe A respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

### CAUTION

To reduce the risk associated with environmental contamination related injury:
- The Conversion Station contains a lithium battery, mercury in the monitor/display, and circuitry that contains lead in the solder. At the end of service life, dispose of the Conversion Station in accordance with federal, state and local requirements.

Using the Tag Dispenser

**IMPORTANT NOTES**

- Do not bend, fold, or damage RFID tags because this may cause premature tag failure.
- If you discover a tag with a hole punched through it, do not use the tag. A hole indicates that the tag was identified as defective during inspection.
- If you receive a system message indicating that a tag cannot be programmed, ask your conversion coordinator where to put these tags.

**Automatic Tag Dispenser components**

The Automatic Tag Dispenser consists of the following components

A  Curved steel spring guide plate
B  Two plastic core inserts
C  Supply roll shaft
D  Stop lever
E  Take-up spool
F  Tag dispenser switch
The Conversion Station comes with a tool kit attached to the inside right front door.

The tool kit contains:
- Three 3M RFID tag threading tools
- Three 3M tag templates to help you correctly place 3M RFID tags in books
- Small screwdriver
- Tweezers
**Loading the tag dispenser with tags**

1. Open the Conversion Station cabinet doors and locate the tag dispenser.

2. Locate the supply role shaft.

3. Rotate the supply roll shaft until it is in the up position.

4. Release the stop lever so that it drops into a horizontal position.

5. Remove the two plastic core inserts from the supply role shaft and install one on each side of the roll of RFID tags.

6. Remove the tape from the roll of RFID tags.
7 Install the roll of tags on the supply role shaft and thread the tags through the unit to the take-up spool.

8 Remove the take-up spool endplate and the take-up spool.

9 If there is a liner from the previous roll of tags, remove it and put the take-up spool back in place.

10 Connect the tag roll to the take-up spool and reinstall the end plate.

The figure shows you how the tag installation should look when you are done with the procedure.
Cleaning the tag dispenser opening

Use a soft cloth to remove any dust from the tag dispenser opening.

Cleaning the spring plate (tensioner/guide)

Clean the spring plate approximately every 5,000 tags or as necessary.

1. Remove the spring plate.
   - Hold the spring plate and remove the four (4) thumb screws that attach the spring plate to the frame.

2. Clean the spring plate with a soft cloth and a mild cleaning solution.
   - The surface of the spring plate that contacts the tags may have a thin waxy build-up.

3. Replace the spring plate.
Troubleshooting Tag Dispenser problems

The tag dispenser switch controls the motor used to advance tags to the feeder opening on the top of the Conversion Station.

The tag dispenser switch has three positions:
- ON (up) position
- OFF (middle) position
- JOG (down) position

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The motor stops before a tag advances into the correct position above the tag feeder opening,</td>
<td>Turn the tag dispenser switch to the OFF (middle) position and then to the ON (up) position. A tag should advance through the tag feeder opening and into the correct position.</td>
</tr>
<tr>
<td>A tag jams below the surface of the tag feeder opening,</td>
<td>1  Go inside the Conversion Station cabinet and clear the jammed tag.</td>
</tr>
<tr>
<td></td>
<td>2  Turn the tag dispenser switch to the OFF (middle) position and then to the ON (up) position. A tag should advance through the tag feeder opening and into the correct position.</td>
</tr>
<tr>
<td>A tag appears in or slightly above the tag feeder opening but you cannot peel off the tag</td>
<td>Turn the tag dispenser switch to the JOG (down) position as many times as necessary to advance or “jog” the tag into the correct position.</td>
</tr>
</tbody>
</table>
