

Ultimate simplicity in temporization.

Protemp[™] Crown

- 9 preformed sizes
- Custom fit
- Excellent strength
- Natural-looking esthetics
- Light curable
- Low intra-oral heat during fitting process
- Low oxygen-inhibited layer
- No unpleasant odor
- Easy to add-on with flowable composite

The world's first preformed, malleable temporary crown.

3M ESPE has brought many firsts to dental professionals worldwide. Now, we bring you Protemp[™] Crown Temporization Material, the world's first single-unit self-supporting, malleable, light-curable composite crown. This revolutionary, time-saving technique can result in higher productivity for you.

As simple as 1-2-3*

No impression or matrix. No dispensing hardware or mix tips.

Trim following gingival contour

Light cure

Finish and polish

What dentists are saying.

“*Making temporaries is now very convenient with no preliminary impression. This revolutionary new process is simple, quick and easy, producing a temporary that fits well, is kind to the tissue, does not come off in my experience, and keeps the occlusion in place. A definite winner for 3M ESPE!*”

— Joseph A. Blaes, DDS

“*This is a paradigm shift in temporization. Adjectives alone cannot convey the practical application of a product like this. It's a total success for high-quality temporary restorations.*”

— Robert G. Ritter, DMD
