Applied to Life.™

3M Traffic Safety and Security

# Fluoropolymer. Applied to taking a stand against graffiti.

3M™ Protective Overlay Film Series 1160 helps you drive down sign replacement costs while promoting public safety. Instead of replacing defaced signs, protect them with a graffiti-resistant overlay film for easier clean-up.

## 3M™ Protective Overlay Film Series 1160

### Promote Safety in Your Community

3M™ Protective Overlay Film Series 1160 works to keep your streets clean and safe with signs that resist permanent defacement. Quickly clean signs covered with Series 1160 to promote safety for motorists and pedestrians while reducing replacement costs.

### Maximum Life Cycle

Protective Overlay Film helps extend the life of your signs. The film works with all 3M sign sheeting – especially high performance sheetings – as a protective layer, allowing for safe and easy clean-up. Signs defaced with graffiti from spray paint, permanent markers or even stickers can be easily cleaned to restore their visibility. Clean-up is quicker than replacement so your crews spend less time on the road, keeping them safer and helping drive down costs.

### Simple to Apply

Protective Overlay Film is quick and easy to apply using either a motorized or hand squeeze roll applicator. Protect public signs from graffiti from the start by applying Series 1160 to new signs before you install them.

### Easy to Clean

3M™ Protective Overlay Film Series 1160 provides a protective layer between your sign face and many common types of graffiti. Many stains can be efficiently removed with a simple detergent washing. Clean tougher graffiti with products designed specifically for graffiti removal. The treatment pays for itself with one clean-up by saving time, labor and replacement costs.

### Guarantee

Series 1160 is designed to work with 3M sheeting and is backed by 3M's Matched Components System warranty to ensure that the overlay and sign are compatible. 3M™ Protective Overlay Film Series 1160 is guaranteed for the same number of years as the 3M reflective sheeting to which it is applied. This means a longer street life for your critical signage.

Quick and simple to apply.

Series 1160 acts as a protective layer to aid in graffiti removal.
