

3M™ Die-Cuttable Tape Series DC2000

Technical Data Sheet

Description

3M™ Die-Cuttable Tape Series DC2000 is a black foam tape designed for the attachment of nameplates, badges, and emblems to the exterior of vehicles. This tape is designed to process easily in all die-cutting operations, including high-speed rotary operations. 3M Series DC2000 tape exhibits high resistance to pluck and torque (twisting) forces normally associated with the attachment of nameplates and emblems.

3M Series DC2000 tape offers the following key features:

- Excellent adhesion to paint and chrome.
- Excellent torque (twist) resistance. 3M Series DC2000 tape has a firm core that resists twisting forces that may result in the detachment of individual letters.
- Excellent resistance to impact in cold weather.

Some typical applications for 3M Series DC2000 tape include:

- Nameplates, badges and emblems.
- Low demand applications whose primary attachment methods are mechanical. Examples include: attachment of lightweight pillar covers, miscellaneous sealing applications and spoiler applications that require tape to perform as a gasket.

Product Construction

Liner Options

SC2	White, 2-side silicone-coated, High Density Polyethylene
PET	Clear, 2-side silicone-coated, Polyester

Physical Properties

	DC2005	DC2008	DC2011	DC2015
Thickness Range	0.51 +/- 0.075mm (0.020 +/- 0.003in.)	0.76 +/- 0.102 mm (0.030 +/- 0.004 in.)	1.14 +/- 0.12 mm (0.045 +/- 0.005 in.)	1.52 +/- 0.12 mm (0.060 +/- 0.005 in.)
Density Range	609 +/- 100 kg/m ³ (38 +/- 4 lb/ft ³)	569 +/- 100 kg/m ³ (35.5 +/- 4 lb/ft ³)	545 +/- 100 kg/m ³ (34 +/- 4 lb/ft ³)	529 +/- 100 kg/m ³ (33 +/- 4 lb/ft ³)

Processing Compatibility

Rotary, flat bed and laser die-cutting operations.

Performance Properties

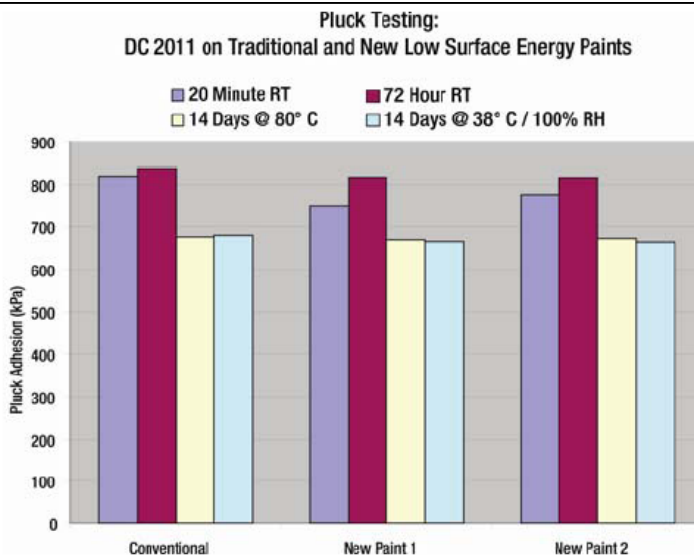

Typical performance of 3M™ Die-Cuttable Tape Series DC2000 is shown below. These values are for reference only.

Note: Care should be taken to make sure the surface is clean and dry prior to application of the tape and to not saturate the tape with strong polar solvents, like alcohols, after initial application. After adhesion build, the DL-2 adhesive is durable to typical automotive environmental conditions and chemicals and provides a robust attachment solution. If this is a concern, please contact your 3M Technical Representative.

When using solvents, extinguish all ignition sources, including pilot lights and follow the manufacturer's precautions and directions for use.

Pluck Testing

Maintains pluck adhesion on new low surface energy and scratch- and mar-resistant paint systems in addition to conventional paint systems.

Torque Testing

3M Series DC2000 tape demonstrates higher resistance to twisting forces (torque) compared to typical competitive tapes.

Static Shear

Exceeds 100 hours at 70°C (158°F). Static shear tests are run with 25.4 mm (1.0 in.) wide by 25.4 mm (1.0 in.) long tape on chrome, 6.8 kg. (15 lb.) roll down against enamel paint. Weight is 500 grams (1.1 lb.).

Shelf Life

Two years from date of manufacture when stored at 4°C–38°C (40°F–100°F) and 0–95% relative humidity (RH). The optimum storage conditions are 22°C (72°F) and 50% relative humidity.

Regulatory Information

Materials Safety Data Sheet (MSDS) available at www.3M.com/MSDS.

Contact Information

The information provided in this technical document is intended as a guide for this product. For more information or help in selecting a 3M product for an application, please contact your 3M application engineer or call product application support at 1-800-328-1684.

Technical Information: The technical information, guidance, and other statements contained in this document or otherwise provided by 3M are based upon records, tests, or experience that 3M believes to be reliable, but the accuracy, completeness, and representative nature of such information is not guaranteed. Such information is intended for people with knowledge and technical skills sufficient to assess and apply their own informed judgment to the information. No license under any 3M or third party intellectual property rights is granted or implied with this information. **Product Selection and Use:** Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property. **Warranty, Limited Remedy, and Disclaimer:** Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price. **Limitation of Liability:** Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.
