

3M™ RBE Loose Fitting PAPR CBRN Upgrade Kit RBE-HUP – Upgrade Kit Checklist

The following steps must be successfully completed to ensure that your upgrade is complete:

- a. BE-10BR (522-02-23) label is legible, intact and matches labels shown on screen or in the user instructions packaged with the product.
- b. Manufacturing date on BE-10BR hood is May 2000 or later.
- c. BE-10BR passed inspection criteria.
- d. System will be used with BP-15 or 520-04-57 batteries only.
- e. The Breathe Easy™ Turbo Unit passed inspection criteria.
- f. Labels on Turbo unit match the labels shown on the screen or in the user instructions packaged with the product.
- g. Motor blower tie wrap inspection criteria met.
- h. Label placed on back plate cover of turbo unit.
- i. Decon belt installed according to instructions.
- j. Breathing tube installed according to instructions.
- k. RBE-57 cartridges installed or instructions reviewed.

This concludes the steps to upgrade your Breathe Easy system to a NIOSH CBRN approved PAPR. You must know the procedures shown in this video and follow them precisely for each system you are upgrading.

Refer to Breathe Easy™ Turbo PAPR Assembly User Instructions for assembly and operation of the complete system

Your life and health depend on it.
