3M Electronic Solutions Division Authorized Distributors
3M Electronic Solutions Division Customers**

Product Change Notice

Molded Assembly, 1M Series TS-2149 Connector Callout: A1

In order to further enhance reliability, a molded rib will be added across the openings on the top of the 3M™ .100" Molded-On PCB *retention solder tail* product. This rib is currently present on all sockets and non-retention tail PCBs. The rib adds stability to the top of the IDC connector and helps prevent ingress of foreign material. All retention tail PCB connector assemblies built in the new North American source of supply will feature this new rib. Malaysia is still working on their release schedule for this retention solder tail product change and will send notification of the dates of their transition in a separate communication.

See the attached POS report for a listing of U.S. affected customers and SKU's.

Picture below of physical product, current and new.

Action Required

Please notify customers of this product change. We do not anticipate any changes in form, fit, or function of this product; however, if re-qualification samples are required, please send requests through normal sample channels.

Should you require any special requirements during this transition, 3M will do whatever is possible to assist you, just let us know.
