Flawless facades with no rework

3M™ Spray Adhesives bond directly to the casting slab, for setting inlays quickly and precisely, eliminating nail holes and the cost of rework. 3M Spray Adhesives add another layer of efficiency and precision to tilt-up construction.

Flawless facades with no rework

3M™ Spray Adhesives add another layer of efficiency and precision to tilt-up construction. With the ability to bond directly to the casting slab without nails, you can eliminate rework due to spalling and stress fractures caused by mechanical fasteners. The versatile, fast-tacking formulas are ideal for bonding to different surfaces, such as plywood and concrete. Spray-on application requires minimal training, so you can have your crew up and running the same day.

Tilt-up solutions

3M™ Hi-Strength Laminating 92 Cylinder Spray Adhesive for larger application

- High strength and high temperature resistance
- Tacky, industrial grade adhesive for use in a wide variety of applications
- Bond reveals, chamfers, shoe plates and inlays to the casting slab replacing mechanical fasteners
- Eliminate slab repairs needed when using mechanical fasteners or other nailing methods
- High holding power, high heat and moisture resistance

3M™ Hi-Strength 90 Spray Adhesive Inverted for Tilt-Up reveal strip application

- High temperature and moisture resistant
- Fast drying
- No extra equipment needed
- Inverted can allows for easy application

Available in regular, inverted and low VOC

3M™ Insulation Polystyrene 78 Inverted

- Designed specifically for bonding expanding polystyrene foams (EPS)
- Forms a bond stronger than the polystyrene foam
- Will not dissolve or degrade polystyrene
- Sprays with a lace pattern optimized for foam bonding

Available in regular and inverted
