## 3M™ Coban™ 2 Layer Compression System

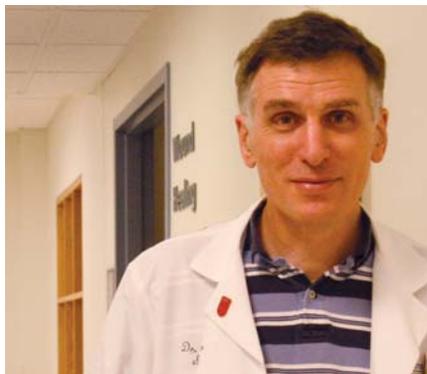

“My patients are happier with  
**Coban 2 Layer**  
**[Compression System]**

than with other systems.”

Joseph Snow, M.D.  
Concord Hospital Wound Healing Center, Concord, NH

Dr. Snow is just one of the many healthcare professionals who have switched to 3M™ Coban™ 2 Layer Compression System because it's:

- **Comfortable:** Thin, lightweight design allows patients to wear normal shoes.
- **Effective:** Delivers sustained compression and less slippage than other leading compression wraps.\*
- **Versatile:** For all types, sizes and shapes of patients with ABI  $\geq 0.8$ .
- **Easy to Use:** Applied in two easy steps, which reduces training time.

\* Clinical data on file at 3M

“When I previously used a four layer wrap, it took extra time to apply and reapply the layers after my patients returned unsatisfied. It was fairly common for my patients to complain that the wrap I used had slipped down their ankle.

Unlike other systems, Coban 2 Layer doesn't slide down the leg. Its inner liner of foam sticks to the skin and the outer wrap, so swelling goes down and the wrap stays on. By integrating this product into my practice, fewer patients come back to my clinic with grievances. Now that we use Coban 2 Layer, the patients' silence says it all.

In addition, my facility costs have been reduced. Our staff finds Coban 2 Layer easy to use, and the minimal learning curve is great for training new members of the team. I feel more confident my staff is not putting it on too tight or too loose. It simplifies my workload because I don't have to be hovering over new staff members.”

To request a FREE demonstration and sample or to share your Coban 2 Layer Compression System success story, call **1-800-228-3957 Ext. 306** or visit **[www.3M.com/Coban2Layer](http://www.3M.com/Coban2Layer)** and select the “Request More Information” button.
