## General Use Directions

**Important remark:** The sponge does not disinfect wiped surfaces; antimicrobial technology resists the growth of odor-causing bacteria within the sponge material itself.

The pad can be used wet or dry.

1. Hold pad with one hand.
2. Place either side of the pad against the surface to be cleaned, apply desired pressure and scrub the area in circular motion.
3. Rinse off scrubbed areas with clean water or wipe off with clean sponge.
4. Clean pad as necessary after use.

## Pad Cleaning Instructions

**Note:** Sponge does not require bleaching. Use of chlorine bleach may destroy the antibacterial agent.

Cleaning pad provides multiple uses. Used and/or worn-out pads can be disposed of in regular kitchen trash.

Pads can be rinsed with warm or hot water or soaked in a cleaning solution to dissolve caked-on soil and grease.

### Pad Cleaning by Hand

1. Spray or rinse off excess food debris from pad using a dish sprayer or sink faucet.
2. Wash the pad in soapy water to remove any remaining food debris and grease. Remove embedded food debris from pad by hand.
3. Rinse pad with clean water. Make sure no food debris is left on the pad. Squeeze excess water from the pad and allow to air dry.
