

# 3M 216U/236U Gold Hookit Disc

These sanding discs combine the quality of the 3M Gold abrasive with the 3M Hookit attachment system. Resin Bond construction increases the life of the disc and ensures a better cut. 3M Fre-Cut coating increases the life of the disc by minimizing clogging or loading. The Hookit attachment ensures that the disc can be reattached and reused for the full life of the disc. Smooth, consistent finishes are fast and easy with 3M Gold Hookit discs, from rough featheredging to primer sanding or paint scuffing.
