Repair Guide

Turn the page if you need to make fast, easy, quality repairs to concrete, wood, metal, sheetrock, plaster, brick, fiberglass, gel-coat or clear glossy surfaces.

Appliance & Porcelain Touch Up Paint
Scratches and other flaws on white or almond appliances can be removed quickly and easily with this convenient half-ounce touch-up bottle.

All-Purpose Putty
If it needs to stay put, these are the formulas for the job. Use the All-Purpose formulation for high strength repairs and the Extra-Strength where a superior bond is needed or where the repair will contact water, temperature extremes, chemicals or petroleum products. Permanently bonds almost anything to almost anything else: securing eye bolts or anchors, bonding loose hinge mountings, repairing broken parts, replacing missing pieces.

All-Purpose Fiberglass Resin
Use for bridging large, gaps in fiberglass boats, tubs or pools. Can also be used to bridge large gaps in metal. Should be used with fiberglass cloth tape or matting (see Accessories, below).

ACCESSORIES
Green means go when you need accessories and tools to complete your Bondo® Home Solutions™ projects. Spreader, mixing boards, fiberglass cloth and matting let you get professional results in less time and for a fraction of the cost!

CONTRACTOR QUALITY – FOR EVERYONE!
Seamless repairs need to stand up to years of abuse, harsh conditions and high stress. When you use Bondo® Home Solutions™ products with the black border, you can make the repair and forget about it. Now in easier-to-measure and mix formulations, these contractor-grade products create superior strong bonds and patches that can be exposed to extremes of heat and cold, water, solvents, salt, oil, gas and chemicals. Extra-Strength products are epoxy-based, requiring longer curing times than other Bondo® Home Solutions™ products.

Extra-Strength Epoxy Resin
Use to repair and seal boat hulls, join fiberglass panels, tub and shower surrounds, deck repairs, pools, tanks, fountains, ponds, outdoor planters, sealing cedar strips, canoes and birdbaths.

Extra-Strength Concrete Repair Epoxy
Creates a watertight repair or coating on garage floors, cracks in basement floors or walls and exterior chimneys.

Extra-Strength Wood Repair Epoxy
Repairs gouges, knotholes or cuts in wood beams, joints, framing posts, rotted wood deck and play equipment supports. For all wood repairs requiring resistance to water, shrinkage, sagging and mildew.

Extra-Strength All-Purpose Epoxy
The best fix for broken bolts, hinges, seams, anchors; wherever permanent strong bonds need to be established or restored. Bonds and fills gaps. For many home repairs in most environment.

Deep Gloss Tabletop Finish
The best fix for broken bolts, hinges, seams, anchors; wherever permanent strong bonds need to be established or restored. Bonds and fills gaps. For many home repairs in most environment.

White Cream Hardener
The best fix for broken bolts, hinges, seams, anchors; wherever permanent strong bonds need to be established or restored. Bonds and fills gaps. For many home repairs in most environment.

“WHEN I FIX IT, AND IT LOOKS RIGHT, THEN I KNOW I CAN TRY EVEN MORE.”

**If you gave me great directions, I would try it!**

**REPAIR KITS**

Have you ever made three or four trips to the hardware store for one small repair? Most people do. Why do you wind up spending more money and time, feeling frustrated and owning tools you'll never use again? Bondo® Home Solutions® Kits take the guesswork out of shopping for home repairs. They include everything you will need to make the repair. Everything. Mixing sticks, cups, mixing boards, spreaders, sandpaper, brushes, fiberglass cloth, tape, hardener, compound and specific step-by-step instructions in plain language. Once you open the kit, you'll be ready to sand and paint in 30 minutes or less (epoxy takes about 24 hours).

**Tub & Shower Repair Kit**

Fill even small scratches, cuts and nicks in the gel-coat of your personal pleasure craft that exposes the fiberglass. The fiberglass absorbs or “wick” moisture and weakens the entire structure. This kit guides you step-by-step on repairing the gel-coat to its original watertight function. Note: If your fiberglass is already weakened, you will need to repair it first, using the Fiberglass Repair Kit described above.

**Multi-Purpose Reinforced Filler**

Use on holes, cracks, scratches in interior Sheetrock® drywall or plaster walls. The white repair compound dries/cures” and is ready to sand and paint in about 30 minutes, even if you put on a thick layer. Try that with spackling and you will end up with cracks, splits and a project that might take several days.

**Wood Filler**

For fixing and filling knotholes in shingles, holes or cracks in brick, stucco and concrete walks, driveways, holes around water pipe outlets, seal around sinks, shower stalls, tubs, toilets, and the area around shower heads. Quarts and gallons available. Few jobs are too large for Bondo® Home Solutions® Metal Repair Compound. Simple, specific directions help you prepare the surface and make permanent repairs to damaged metals of all types, including aluminum and galvanized. Quarts and gallons available.

**Metal Repair Compound**

Water leaks, contact with the ground, leaves, compost or even constant shade can rot large sections of wood outdoors and indoors. Rotted Wood Stabilizer (pints or quarts) penetrates deeply into rotted wood fibers and hardens them. Then use Bondo® Home Solutions® Wood Filler to replace the missing sections.

**Fiberglass Reinforced Repair Kit**

For repairing and strengthening fiberglass item around the home or business. Boat hulls, trailer caps, water tanks, laundry tubs, shower surrounds, storage units, outdoor furniture, central air wheelbarrows, garage and entry doors, windows and metal siding. The best bet for broken bolts, hinges, seams, anchors, wherever permanent strong bonds need to be established or restored. Bonds and fills gaps.

**Easy Patch**

The best bet for broken bolts, hinges, seams, anchors wherever permanent strong bonds need to be established or restored. Bonds and fills gaps.

**Self-Adhesive Metal Patch**

The best bet for broken bolts, hinges, seams, anchors wherever permanent strong bonds need to be established or restored. Bonds and fills gaps.

**Aqua Jet & Snowmobile Repair Kit**

Fill even small scratches, cuts and nicks in the gel-coat of your personal pleasure craft that expose the fiberglass. The fiberglass absorbs or “wick” moisture and weakens the entire structure. This kit guides you step-by-step on repairing the gel-coat to its original watertight function. Note: If your fiberglass is already weakened, you will need to repair it first, using the Fiberglass Repair Kit described above.

**Concrete, Brick & Stucco Repair Compound**

For filling and filling knot holes in shingles, holes or cracks in brick, stucco and concrete walks, driveways, holes around water pipe outlets, seal around sinks, shower stalls, tubs, toilets, and the area around shower heads. Quarts and gallons available.

**Drywall Repair Compound**

Available in quarts or gallons. Bondo® Home Solutions® Drywall Repair Compound should be used anytime you don’t want to wait for spackling to dry. When, crack and recure. This compound “cures” in 30 minutes without shrinking. One coat and you are ready to sand! Few jobs are too large for Bondo® Home Solutions® Metal Repair Compound. Simple, specific directions help you prepare the surface and make permanent repairs to damaged metals of all types, including aluminum and galvanized. Quarts and gallons available.

**REPAIRING SPECIFIC MATERIALS**

Look for the blue label on packages used from half pints to gallons to help you with any size repair project. Unlike competing products, storing Bondo® Home Solutions® for future use is never a problem. Our compounds will not “dry” out in the can, and can be kept (and used) in cold or warm areas. Our 30-minute drying, easy sanding and strong bonding is why Bondo® brand products have been used in the home by professionals for decades.

**Rotted Wood Stabilizer**

For fixing and filling knotholes in shingles, holes or cracks in brick, stucco and concrete walks, driveways, holes around water pipe outlets, seal around sinks, shower stalls, tubs, toilets, and the area around shower heads. Quarts and gallons available.

**Metal Repair Compound**

Few jobs are too large for Bondo® Home Solutions® Metal Repair Compound. Simple, specific directions help you prepare the surface and make permanent repairs to damaged metals of all types, including aluminum and galvanized. Quarts and gallons available.

**Concrete, Brick & Stucco Repair Compound**

For fixing and filling knot holes in shingles, holes or cracks in brick, stucco and concrete walks, driveways, holes around water pipe outlets, seal around sinks, shower stalls, tubs, toilets, and the area around shower heads. Quarts and gallons available.

**Wood Filler**

Half pints, quarts and gallon sizes let you purchase the right amount for your projects. Restores and fills cracks, holes, splits and scratches in wood. Can be stained, varnished, primed, painted, drilled, sanded, rounded, carved, planed, shaped or filled in only 20–30 minutes.

**Scratch & Nail Hole Repair Putty**

No more or不满 is needed for you to make quick repairs to nail holes, other small holes or scratches in wood trim, sheetrock, plastic, paneling or exterior surfaces. Comes in handy 1.5 oz. or 4.5 oz. tubs.

**Concrete, Brick & Stucco Repair Compound**

For fixing and filling knot holes in shingles, holes or cracks in brick, stucco and concrete walks, driveways, holes around water pipe outlets, seal around sinks, shower stalls, tubs, toilets, and the area around shower heads. Quarts and gallons available.

**Drywall Repair Compound**

Available in quarts or gallons. Bondo® Home Solutions® Drywall Repair Compound should be used anytime you don’t want to wait for spackling to dry. When, crack and recure.
