Product Name *Bondo® Bumper Repair Kit*

Product Number *280*

UPC Code *076308 002800*

Dimensions *W 3.75 x H 8 x D 1.125 inches*

Weight *0.13 lb*

Case Information:

Case Quantity *6*

Dimensions *L 10.875 x W 7.25 x H 5.75 inches*

Weight *1.21 lb*

Pallet Information:

Pallet Build *20 cases per layer,
6 high, 120 total units
per pallet*

SURFACE PREPARATION:

- Sand the area to be repaired 3 inches in every direction around damaged area.

MIXING:

- Dispense equal parts of epoxy and hardener from syringe. Mix thoroughly.

APPLICATION:

- Spread over repair area to contour of bumper. Working life of the mix is only 6 minutes at 77°F (25°C).

NOTE: For rips, use paste as an adhesive in addition to using it as a filler. Use a clamp or apply pressure to hold rip in place. For holes, use fiberglass screen as back up for repair. Use repair paste to tack screen in place. Let cure 15 minutes and fill with repair paste.

DRYING/SANDING TIMES:

- Allow to harden completely, approximately 30 minutes, then sand to bumper level. If necessary, repeat application to fill minor imperfections and pinholes.

PRIME/PAINT:

- Sand again. Clean entire surface prior to painting.
