

we're advancing satisfaction.

CHAIR TIME SHOULDN'T CUT INTO

FAMILY TIME

\*Individual patient treatment requirements will vary.

## IT'S ALL ABOUT PATIENT SATISFACTION.

With SmartClip™ SL3 Self-Ligating Braces, Orthodontic treatment has become easier. Lighter archwire engagement and disengagement forces and simple archwire changes make office visits easier, so patients can get out of the chair faster. And lighter forces during treatment means achieving their desired results can be easier on them too. It's even easier on you, because using

3M self-ligating braces means you'll be able to see patients less frequently and for shorter visits while building great smiles\*. And, as a result, it can be easier for your practice to grow.

Uniquely designed SmartClip SL3 Braces are something you and your patients will have many reasons to smile about. From the beginning of treatment to the resulting great smile, it's 3M innovation and patient satisfaction that's behind the design of our advanced generation of self-ligating braces.
