

Patient Take-Home Instructions

Your surgeon used 3M™ DuraPrep™ Surgical Solution (Iodine Povacrylex [0.7% Available Iodine] and Isopropyl Alcohol [74% w/w]) Patient Preoperative Skin Preparation, a bacteria-killing skin preparation. It is recommended that this film remain on the skin after the procedure. The film will gradually wear away. However, if early removal is required:

- Apply 8610 or 8611 3M™ Remover Lotion to the prepped area keeping away from the wound edge or puncture site. Wipe off with a disposable towel, or
- Soak gauze with 70% isopropyl alcohol and place on the prepped area for at least 40 seconds. Lightly scrub to remove the solution.
