

Radial Bristle Discs

Faster, more cost-effective gasket and coatings removal, weld preparation and cleaning in hard-to-reach areas

- **Use with common high speed die grinders**
- Clean tight, awkward, recessed area
- Longer life

- **Effectively clean carbon and O-ring residue**
- Faster cut rate than wire brushes
- Safer to use, no flying wires

- **Quickly removes seam sealers, paint and other heavy coatings**
- Flexible bristle conforms to part and cleans with minimal base material removal
- Non-loading

3M™ Radial Bristle Discs for hard-to-reach areas

Product Information

3M™ Radial Bristle Discs are abrasive-filled products with unique features designed to increase productivity in the following applications:

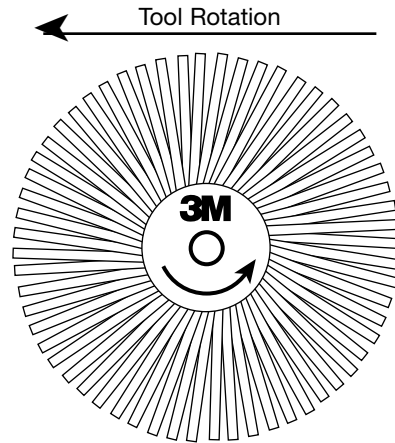

- Remove adhesive, paint and other coatings, discoloration, heavy oxides and surface contaminants.
- Clean and prepare surfaces before and after welding.

Increase Productivity

- Patented abrasive-filled bristles apply a continuous, fresh supply of sharp 3M™ Regalite™ mineral to the workpiece. Resists loading for longer life and consistent performance.
- Unique bristle pattern reaches tight or hard-to-reach areas such as grooves and along 90° angles.
- Flexible bristles conform to the part and clean without removing base material. Helps reduce damage and rework.
- Uniform concentration of Regalite mineral provides a higher cut rate than wire brushes for a faster, more uniform finish. Lowers operational costs.

Easy to Use

- 3M™ Radial Bristle Discs can be ganged, one to four discs using the 3M™ 990 mandrel.
- Color coding helps to select proper abrasive grade.

Refer to directional arrow on disc for proper loading on tool.

Caution: Always use protective eye wear and/or face shield as recommended in ANSI Standard Z87.1.

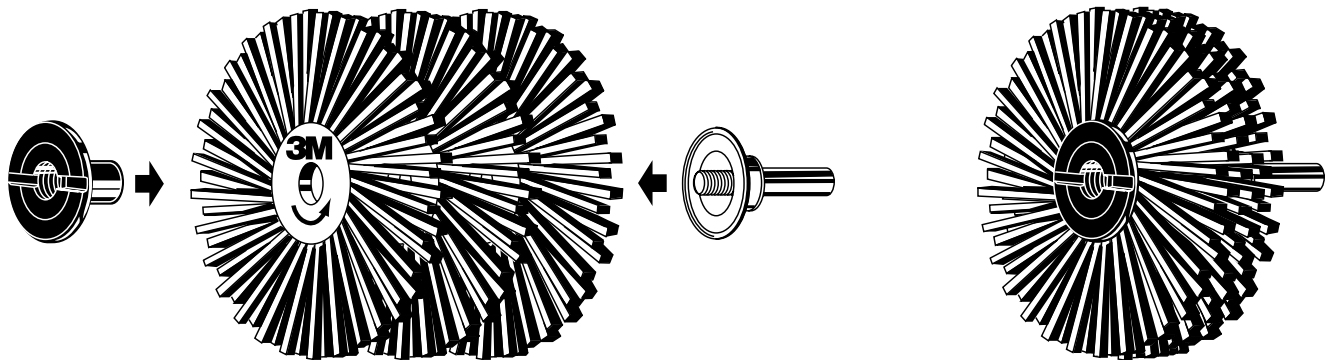

Ordering Information

3M™ Radial Bristle Discs—3 in.

Description	Stock Number	UPC Number	Max. Op. Speed	Items per box	Boxes per case
