**Product Discontinuation Notice:
3M™ Macurco™ CM-15A**

Effective immediately, 3M OH&ESD is announcing the discontinuation of the 3M™ Macurco™ CM-15A 12-24V CO Detector. Product and stock number information is below.

<u>Product</u>	<u>Stock Number</u>	<u>Description</u>
CM-15A	70-0714-0327-6	12-24V, 2 relays, buzzer, UL/MEA approved CO Detector

For those customers who need a UL-approved CO Detector with similar specifications, we recommend the CM-E1, Stock Number 70-0715-4473-1 listed to UL2075.

The CM-E1 provides all of the functionality of the CM-15A plus updated features including Speed Mount Installation and 3M EZ-Check Technology for quick and easy field tests – all at a list price 38% less than the CM-15A.

The CM-E1's sleek design extends less than ½" from the wall when flush mounted, allowing it to blend seamlessly with a room's design elements.

We regret any inconvenience this may cause but are confident that the CM-E1 with its new features can meet your needs even more effectively.

For further questions or information, please visit www.3M.com/Macurco or call 3M at 1-800-243-4630.

Thank you,

Nick Eleftheriou
3M Global Detection Business Manager
