**Disclaimer:**

HCPCS codes have been provided to assist you in the preparation of insurance claims. Please note, however, that the reimbursement information provided by 3M Health Care and its representatives is intended to provide general information relevant to coverage and coding for 3M products. Insurers' reimbursement policies can vary and the use of the codes discussed here does not guarantee that an insurer will cover or pay at any particular level. Health care providers should exercise independent clinical judgment in choosing the codes which most accurately describe the products provided.

## Evidence-based

There are over 70 pieces of clinical evidence<sup>(5)</sup> supporting the efficacy and cost-effectiveness of Cavilon No Sting Barrier Film for multiple clinical uses. This represents more evidence than any other moisture barrier or barrier film.

from condom catheters

Medical adhesive-related skin injury (MARS<sup>1</sup>)  
at infusion sites (peripheral)

Incontinence-Associated dermatitis

Friction over bony prominences

## 3M™ Cavilon™ No Sting Barrier Film

**What is it?** Cavilon No Sting Barrier Film is an alcohol-free barrier film. It contains unique ingredients called polymers that form a waterproof, protective coating on the skin. It is breathable and transparent allowing for continuous visualization and monitoring of skin. It is flexible and conforms to the skin during movement or position changes.

- Fragrance-free
- Hypoallergenic<sup>(2)</sup>
- Non-cytotoxic<sup>(2)</sup>—can be used on intact and damaged skin
- Cost-effective<sup>(3, 4)</sup>
