# 3M™ Flexible Prismatic Reflective Sheeting for Traffic Cones Series 3340

Attention-getting brightness helps improve temporary traffic control safety.

- ▶ Wide-angle reflectivity gives cones full-width appearance at night
- ▶ Flexible, specially designed shapes with pressure-sensitive adhesive apply quickly and easily
- ▶ Durable construction withstands the rigors of the roadway environment
- ▶ Made specifically for the chemistry of polyvinyl chloride (PVC) traffic cones

## Visibly bright short-term traffic control

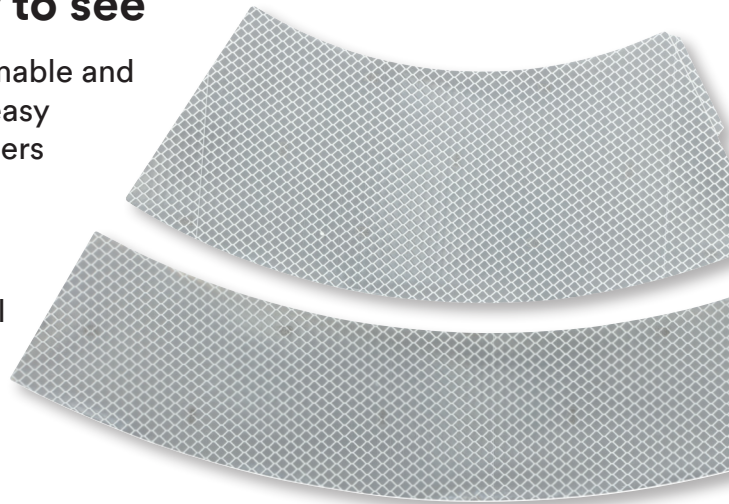

Reflectorized cones are the first choice in temporary traffic control for short-term work zones, repair calls and emergency response. Traffic cones help to protect workers and motorists alike, and they are easy to install and pick up after work is completed.

3M™ Flexible Prismatic Reflective Sheeting Series 3340 is ideal for reflectorizing reboundable polyvinyl chloride (PVC) traffic cones. Its unique design provides excellent wide angle reflectivity, giving cones a fullwidth appearance at night. An impact resistant coating improves durability and holds up during constant handling and abuse.

## The application advantages are easy to see

Cone sleeves made from Series 3340 are highly conformable and come with pre-coated, pressure-sensitive adhesive for easy application. Thin, flexible and durable, the sheeting delivers superb performance and brightness throughout its life.
